UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA
SAN JOSE DIVISION

IN RE ANTHEM, INC. DATA BREACH
LITIGATION

Case No. 15-MD-02617-LHK

**ORDER ADOPTING IN PART SPECIAL
MASTER’S REPORT AND
RECOMMENDATION RE: MOTION
FOR ATTORNEYS’ FEES,
LITIGATION EXPENSES, AND
SERVICE AWARDS TO CLASS
REPRESENTATIVES; ORDER
GRANTING ADMINISTRATIVE
MOTIONS TO FILE UNDER SEAL¹**

Re: Dkt. No. 916-6, 1002, 1008, 1037

Before the Court is a motion for attorneys’ fees, litigation expenses, and service awards to class representatives arising out of the class action settlement (“Settlement”) between individual and representative Plaintiffs² and the Settlement Class they represent (collectively, “Plaintiffs”), and Defendants Anthem, Inc.; Blue Cross Blue Shield Association; and affiliates³ (collectively,

¹ This order supersedes ECF No. 1047, which has been vacated.
² All named Plaintiffs are identified in paragraphs 12 through 113 of the Fourth Consolidated Amended Class Action Complaint (“FCAC”). *See* ECF No. 714-3 (“FCAC”) ¶¶ 12–113.
³ Defendants are identified in paragraphs 114 through 158 of the FCAC. *See* FCAC ¶¶ 114–58. The affiliates listed in the Settlement are: Blue Cross and Blue Shield of Georgia, Inc.; Blue Cross

1 “Defendants”). ECF No. 916-6 (“Fee Mot.”). In connection with that motion, Plaintiffs have also
 2 moved to file certain portions of their billing records under seal. ECF Nos. 1002, 1037.

3 After the Final Approval Hearing on February 1, 2018, this Court decided to appoint a
 4 Special Master to assist in reviewing the motion for attorneys’ fees. ECF No. 972 at 7. On
 5 February 8, 2018, this Court appointed Hon. James Kleinberg (Ret.) to serve as Special Master.
 6 ECF No. 985 at 2. Judge Kleinberg issued his Report and Recommendation on April 24, 2018.
 7 ECF No. 1008 (“R. & R.”). This Court held a hearing on June 14, 2018. ECF No. 1033. At the
 8 hearing, the parties agreed to extend the deadline for revoking exclusions and submitting claims to
 9 July 19, 2018 because of the parties’ April 2018 amendment to the Settlement.

10 Having considered the submissions of the parties, the arguments made at the February 1
 11 and June 14, 2018 hearings, the relevant law, and the record in this case, the Court hereby
 12 ADOPTS in part Judge Kleinberg’s Report and Recommendation. Thus, the Court GRANTS in
 13 part and DENIES in part Plaintiffs’ motion for attorneys’ fees, litigation expenses, and service
 14 awards to class representatives. The Court also GRANTS Plaintiffs’ motions to seal.

15 **I. BACKGROUND**

16 Anthem, Inc. (“Anthem”) is one of the largest health benefits and health insurance
 17 companies in the United States. FCAC ¶ 114. Anthem serves its members through various

18 Blue Shield Healthcare Plan of Georgia, Inc.; Anthem Insurance Companies, Inc.; Blue Cross of
 19 California; Anthem Blue Cross Life and Health Insurance Company; Rocky Mountain Hospital
 20 and Medical Service, Inc.; Anthem Health Plans, Inc.; Anthem Health Plans of Kentucky, Inc.;
 21 Anthem Health Plans of Maine, Inc.; HMO Missouri, Inc.; RightCHOICE Managed Care, Inc.;
 22 Healthy Alliance Life Insurance Company; Anthem Health Plans of New Hampshire, Inc.; Empire
 23 HealthChoice Assurance, Inc.; Community Insurance Company; Anthem Health Plans of Virginia,
 24 Inc.; HealthKeepers, Inc.; Blue Cross Blue Shield of Wisconsin; CompCare Health Services
 25 Insurance Corporation; Amerigroup Corporation; Amerigroup Services, Inc.; Amerigroup Kansas,
 26 Inc.; Amerigroup Washington, Inc.; HealthLink, Inc.; UniCare Life & Health Insurance Company;
 27 CareMore Health Plan; The Anthem Companies, Inc.; The Anthem Companies of California, Inc.;
 28 Blue Cross and Blue Shield of Alabama; USABLE Mutual Insurance Company, d/b/a Arkansas
 Blue Cross and Blue Shield; California Physicians’ Service d/b/a Blue Shield of California; Blue
 Cross and Blue Shield of Florida, Inc. d/b/a Florida Blue; CareFirst of Maryland, Inc.; Blue Cross
 and Blue Shield of Massachusetts, Inc.; Blue Cross and Blue Shield of Michigan; BCBSM, Inc.
 d/b/a Blue Cross and Blue Shield of Minnesota; Horizon Healthcare Services, Inc.; Blue Cross and
 Blue Shield of North Carolina; Highmark Inc. f/k/a Highmark Health Services; Blue Cross and
 Blue Shield of Vermont; and Health Care Service Corporation, a Mutual Legal Reserve Company.

1 Anthem affiliates and other Blue Cross Blue Shield licensee affiliates. *Id.* In order to provide
2 certain member services, Defendants “collect, receive, and access their customers’ and members’
3 extensive individually identifiable health record information.” *Id.* ¶ 161. These records include
4 personal information (such as name, address, date of birth, and Social Security number) and
5 individual health information. *Id.* Anthem maintains a common computer database which
6 contains the personal information of current and former members of Anthem, Anthem’s affiliates,
7 Blue Cross Blue Shield, and independent Blue Cross Blue Shield licensees. *Id.* ¶ 162.

8 In late 2014 and early 2015, Anthem experienced one of the largest data breaches in
9 history. *Id.* ¶ 1. Cyberattackers gained access to the personal information of approximately 80
10 million individuals stored on Anthem’s database. *Id.* ¶¶ 1, 3. After Anthem publicly announced
11 the breach in February 2015, *id.* ¶ 334, a number of lawsuits were filed against Defendants. In
12 spring 2015, Plaintiffs in several lawsuits moved to centralize pretrial proceedings in a single
13 judicial district. *See* 28 U.S.C. § 1407(a) (“When civil actions involving one or more common
14 questions of fact are pending in different districts, such actions may be transferred to any district
15 for coordinated or consolidated pretrial proceedings.”). On June 12, 2015, the Judicial Panel on
16 Multidistrict Litigation issued a transfer order selecting the undersigned judge as the transferee
17 court for “coordinated or consolidated pretrial proceedings” in the multidistrict litigation (“MDL”)
18 arising out of the Anthem breach. *In re Anthem, Inc., Customer Data Sec. Breach Litig.*, 109 F.
19 Supp. 3d 1364 (U.S. Jud. Pan. Mult. Lit. 2015).

20 Over the next two years, the parties litigated multiple rounds of motions to dismiss and
21 fully briefed the issue of class certification (including challenges to the other side’s experts) before
22 this Court. However, prior to any formal class-certification ruling from the Court, the parties
23 reached a Settlement Agreement in June 2017. *See* ECF No. 869-8 (“Settlement”). The parties
24 moved for preliminary approval of that Settlement on June 23, 2017. ECF No. 869-5. A hearing
25 was held on August 17, 2017, ECF No. 897, and the Court granted preliminary approval of the
26 \$115 million settlement on August 25, 2017, ECF No. 903 at 9.

1 On December 1, 2017, Plaintiffs filed the instant motion for attorneys’ fees, litigation
 2 expenses, and service awards to class representatives. *See* Fee Mot. Plaintiffs requested
 3 attorneys’ fees in the amount of \$37.95 million as well as litigation expenses and service awards
 4 for class representatives. *Id.* at 1. The same day, Plaintiffs filed a motion for final approval of the
 5 settlement. ECF No. 916-3. On January 4, 2018, objector Adam Schulman (“Schulman”) filed a
 6 Motion to Appoint Special Master to conduct an exhaustive review of Plaintiffs’ billing records.
 7 ECF No. 929. The Court advanced the hearing on the Motion to Appoint Special Master to the
 8 same day as the hearing on Plaintiffs’ motion for final approval and motion for attorneys’ fees,
 9 litigation expenses, and service awards to class representatives. ECF No. 940. The Court held the
 10 Final Approval Hearing on February 1, 2018. ECF No. 966.

11 At the Final Approval Hearing, the Court indicated its intention to appoint a Special
 12 Master. ECF No. 974 at 48:20–49:6. The Court memorialized that ruling in an Order Appointing
 13 Special Master issued the day after the hearing. ECF No. 972. The Court noted the sheer size of
 14 the attorneys’ fees request, which covered “[329] billers from 53 law firms and 78,892.5 hours of
 15 legal work.” *Id.* at 4.⁴ These figures stood in tension with the Court’s rejection of an eight-firm
 16 leadership team and appointment of a leaner team consisting of four law firms. *Id.* at 2–3. Indeed,
 17 the Court had instructed Class Counsel that they could assign “discrete tasks to counsel for other
 18 plaintiffs in this MDL” but emphasized that “this augmentation of resources should be on an as
 19 needed basis and consistent with efficiency.” *Id.* at 3–4 (alteration omitted) (quoting ECF No. 286
 20 at 1).

21 The Court also identified issues that justified having a Special Master perform a close
 22 examination of the attorneys’ fees request. In particular, “based on Co-Lead Plaintiffs’ Counsel’s
 23 assignment of tasks across 53 law firms and [329] billers, the Court [had] concerns that billing
 24 items may be duplicative or inefficient.” *Id.* at 5. The Court explained that “employing 53 law
 25 firms likely resulted in unnecessarily duplicative or inefficient work by virtue of the fact that so

26 ⁴ The Court’s order states that there are 331 billers. It appears that some billers may have been
 27 listed twice. In any event, the correct number of 329 billers will be used throughout this order.

1 many billers needed to familiarize themselves with the case and keep abreast of case
 2 developments.” *Id.* The Court also pointed out that Plaintiffs had more partners than associates
 3 work on the case (by the Court’s count, 107 partners and 94 associates⁵) and that Plaintiffs used a
 4 large staff of contract and staff attorneys with markups as high as \$447.00 an hour for their work.
 5 *Id.* at 4. In light of these concerns, the Court exercised its authority under Federal Rule of Civil
 6 Procedure 23(h) to refer “issues related to the amount of the award to a special master.” *Id.* at 6.

7 The Court suggested that Judge Kleinberg serve as the Special Master but provided the
 8 parties an opportunity to object to Judge Kleinberg and to suggest other candidates. *Id.* at 7. On
 9 February 2, 2018, Plaintiffs filed a statement indicating that they had no objection to Judge
 10 Kleinberg, unless Judge Kleinberg revealed a ground for disqualification under 28 U.S.C. § 455.
 11 ECF No. 970 at 2. Once Judge Kleinberg filed an affidavit affirming that he had no grounds for
 12 disqualification under § 455, ECF No. 982, the Court provided the parties another opportunity to
 13 object, ECF No. 983. With no objection from any party, the Court formally appointed Judge
 14 Kleinberg as Special Master in a February 8, 2018 order detailing his duties. ECF No. 985. The
 15 Court ordered Judge Kleinberg to “proceed with all reasonable diligence to analyze the evidence
 16 in the record regarding the time and expenses spent litigating this case in order to prepare a report
 17 calculating the lodestar for the representation of the Class in this action.” *Id.* at 2. In deciding the
 18 appropriate lodestar, Judge Kleinberg had access to the entire record and was instructed to
 19 “determine the hours reasonably expended, deducting the time and expenses that are excessive,
 20 unnecessary, or duplicative.” *Id.*

21 On April 24, 2018, Judge Kleinberg filed his Report and Recommendation. *See R. & R.*
 22 Although the specifics of the Report and Recommendation are discussed in more detail below, the
 23 Court highlights a few points here. The Report and Recommendation focuses on two particularly

24 ⁵ Based on an updated chart, it appears that the total number of partners is 107 and the total
 25 number of associates is 92. ECF No. 944-1 (“Cervantez Reply Decl.”), Ex. E. Some of the
 26 associates were previously listed incorrectly. Cervantez Reply Decl. ¶ 16. Professor Rubenstein
 27 arrives at slightly different numbers—namely, 106 partners and 96 associates. Rubenstein Decl.
 28 ¶ 14 & n.9. These minor variations do not change the Court’s analysis.

1 concerning issues with regard to Class Counsel’s billing: (1) rates charged for contract and staff
 2 attorneys and (2) reasonableness of the time spent on certain categories of tasks. *Id.* at 6. The
 3 Special Master concludes that the contract and staff attorney rates are too high and proposes
 4 substituting a flat rate of \$156 per hour for all contract and staff attorney time. *Id.* at 10–14. The
 5 Special Master also determines that many of the hours (especially those related to depositions and
 6 settlement) were not reasonably expended and recommends taking a 10% haircut of the entirety of
 7 the hours to account for this duplication. *Id.* at 15–18, 24–25. The Special Master identifies three
 8 alternative ways to calculate the attorneys’ fees award: (1) apply the Ninth Circuit’s 25%
 9 benchmark to the \$115 million Settlement Fund, (2) use an average billing rate multiplied by the
 10 claimed number of hours, or (3) calculate the lodestar by applying the revised hourly rate of \$156
 11 for contract and staff attorney time plus the 10% haircut for excessive hours. *Id.* at 26–28. The
 12 Special Master ultimately recommends adopting the third approach, resulting in a cut of over \$7
 13 million to Class Counsel’s requested attorneys’ fees award. *Id.* at 28.

14 On the same day that the Special Master issued his Report and Recommendation, the Court
 15 set a briefing and hearing schedule. ECF No. 1009. On May 15, 2018, Plaintiffs and Schulman
 16 filed simultaneous objections to the Special Master’s Report and Recommendation. ECF Nos.
 17 1016 (“Schulman Obj.”), 1017 (“Pls.’ Obj.”). On May 22, 2018, Plaintiffs and Schulman filed
 18 responses to each other’s objections. ECF Nos. 1018 (“Schulman Resp.”), 1019 (“Pls.’ Resp.”).
 19 The Court held a hearing on June 14, 2018. ECF No. 1033.

20 **II. DISCUSSION**

21 The instant motions contain specific requests for attorneys’ fees, reimbursement of
 22 litigation expenses, service awards to class representatives, and sealing of portions of Plaintiffs’
 23 billing records. The Court addresses each in turn.

24 **A. Attorneys’ Fees**

25 **1. The Appropriate Method: Lodestar vs. Percentage of Recovery**

26 “Where,” as here, “a settlement produces a common fund for the benefit of the entire class,
 27 courts have discretion to employ either the lodestar method or the percentage-of-recovery

1 method.” *In re Bluetooth Headset Prod. Liab. Litig.*, 654 F.3d 935, 942 (9th Cir. 2011). “[T]he
2 choice between lodestar and percentage calculation depends on the circumstances, but . . . ‘either
3 method may . . . have its place in determining what would be reasonable compensation for
4 creating a common fund.’” *Six (6) Mexican Workers v. Arizona Citrus Growers*, 904 F.2d 1301,
5 1311 (9th Cir. 1990) (third alteration in original) (quoting *Paul, Johnson, Alston & Hunt v.*
6 *Grauly*, 886 F.2d 268, 272 (9th Cir. 1989)). To guard against an unreasonable result, the Ninth
7 Circuit encourages district courts to “cross-check[] their calculations against a second method.” *In*
8 *re Bluetooth*, 654 F.3d at 944; *see also Vizcaino v. Microsoft Corp.*, 290 F.3d 1043, 1050–51 (9th
9 Cir. 2002) (applying a lodestar cross-check to ensure the percentage-of-recovery method yielded a
10 reasonable result).

11 Where the percentage-of-recovery method is employed, it is well established that 25% of a
12 common fund is a presumptively reasonable amount of attorneys’ fees. *See, e.g., In re Bluetooth*,
13 654 F.3d at 942 (“[C]ourts typically calculate 25% of the fund as the ‘benchmark’ for a reasonable
14 fee award, providing adequate explanation in the record of any ‘special circumstances’ justifying a
15 departure.”); *Six (6) Mexican Workers*, 904 F.2d at 1311 (“[W]e established 25 percent of the fund
16 as the ‘benchmark’ award that should be given in common fund cases.”). That said, “[t]he 25%
17 benchmark rate, although a starting point for analysis, may be inappropriate in some cases.”
18 *Vizcaino*, 290 F.3d at 1048. Upward departures may be warranted in particular circumstances,
19 while downward departures may be warranted where there is no “realistic risk of nonrecovery.”
20 *Perkins v. LinkedIn Corp.*, No. 13-CV-04303-LHK, 2016 WL 613255, at *14 (N.D. Cal. Feb. 16,
2016) (quoting *In re Quantum Health Res., Inc.*, 962 F. Supp. 1254, 1257–58 (C.D. Cal. 1997)).

21 Under the lodestar method, a “lodestar figure is calculated by multiplying the number of
22 hours the prevailing party reasonably expended on the litigation (as supported by adequate
23 documentation) by a reasonable hourly rate for the region and for the experience of the lawyer.”
24 *In re Bluetooth*, 654 F.3d at 941 (citing *Staton v. Boeing Co.*, 327 F.3d 938, 965 (9th Cir. 2003)).
25 The district court may adjust this lodestar figure “upward or downward by an appropriate positive
26 or negative multiplier reflecting a host of ‘reasonableness’ factors.” *Id.* at 941–42.

1 Whatever method a court chooses, its decision “must be supported by findings that take
2 into account all of the circumstances of the case.” *Vizcaino*, 290 F.3d at 1048. The Ninth Circuit
3 has approved a number of factors which may be relevant to the district court’s determination: (1)
4 the results achieved; (2) the risk of litigation; (3) the skill required and the quality of work; (4) the
5 contingent nature of the fee and the financial burden carried by the plaintiffs; and (5) awards made
6 in similar cases. *See id.* at 1048–50.

7 Here, Class Counsel advocate for applying the percentage-of-recovery method.
8 Specifically, Class Counsel ask for 33% of the \$115 million settlement (i.e., \$37.95 million). Fee
9 Mot. at 1. This is the maximum amount allowed by the Settlement Agreement. ECF No. 869-8
10 (“Settlement”) ¶ 12.1.

11 The Special Master’s Report and Recommendation makes three alternative
12 recommendations for how to calculate attorneys’ fees in this case. The first recommendation is to
13 award 25% of the \$115 million Settlement Fund. R. & R., at 26. The second recommendation is
14 to apply an overall average rate to the entirety of the hours billed in the case. *Id.* at 27. The third,
15 and final, recommendation is to use Class Counsel’s lodestar but reduce the total amount by (1)
16 lowering the hourly rate for contract and staff attorneys and (2) applying an across-the-board 10%
17 haircut for excessive hours. *Id.* The Special Master ultimately advises adopting the third
18 approach as the one that “is considerate of counsel’s efforts . . . in light of the results achieved for
19 the present and the future,” “allows a significant monetary reward for the class,” and “recognizes
20 the overcharging outlined [in the Report and Recommendation].” *Id.* at 28.

21 Having overseen this case for three years, the Court finds that justice would be best served
22 by applying the percentage-of-recovery method. The percentage-of-recovery method is
23 commonly used in the legal marketplace to determine attorneys’ fees in contingency fee cases.
24 *See 5 Newberg on Class Actions* § 15:62 (5th ed. 2018) (“[M]any courts utilize a percentage
25 approach, which approximates the manner in which plaintiff contingent fee lawyers undertake
26 work outside the class action context.” (footnote omitted)). This method has been applied in
27 megafund cases like the one here. *See Alexander v. FedEx Ground Package Sys., Inc.*, No. 05-

1 CV-00038-EMC, 2016 WL 3351017, at *2 (N.D. Cal. June 15, 2016) (collecting cases from this
2 circuit applying percentage method in megafund cases); 5 Newberg, *supra*, § 15:81 (discussing
3 different approaches to applying percentage method in megafund cases). By tying the award to
4 the recovery of the Class, Class Counsel’s interests are aligned with the Class, and Class Counsel
5 are incentivized to achieve the best possible result. *See* 5 Newberg, *supra*, § 15:65. Here, the
6 percentage-of-recovery method rewards Class Counsel for assuming the risks of the litigation in
7 this developing area of the law and for prosecuting the case to obtain a benefit proportional to the
8 Class’s injury.

9 In contrast, the combination of novel legal issues and technical subject matter present in
10 the instant case counsels against the lodestar method because there is no set baseline against which
11 to compare whether hours were reasonably expended. *See In re Bluetooth*, 654 F.3d at 941
12 (providing that one essential element of the lodestar is a reasonable number of hours); *Chalmers v.*
13 *City of Los Angeles*, 796 F.2d 1205, 1210 (9th Cir. 1986) (allowing courts to eliminate from the
14 lodestar calculation any hours that are duplicative, excessive, or otherwise unnecessary). Indeed,
15 the lodestar method has sometimes been criticized because it encourages counsel to bill time and
16 create opportunities to bill time. *See* 5 Newberg, *supra*, § 15:65 (noting that the lodestar method
17 creates incentives for the lawyers to “run up” the number of hours billed and to “bill useless hours
18 at the class’s expense”). The Court has already highlighted the potential for such excess in the
19 instant case, especially when the work has been spread across 329 billers at 53 law firms.

20 Moreover, the Court has some concerns about whether the lodestar figure provides a
21 helpful and accurate starting place in this case. Class Counsel’s formal attorneys’ fees request
22 claims 78,892.5 hours of work. *See* ECF No. 960-4. That number does not reflect the total
23 amount of time submitted by each billing law firm to Class Counsel because Class Counsel did a
24 preliminary cut of time. ECF No. 960-2 ¶ 6. Specifically, out of a total of 83,351.5 hours, Class
25 Counsel deleted 4,459 hours. ECF No. 960-4. By cutting that number of hours, Class Counsel
26

1 lowered the lodestar figure to \$37,993,566.50,⁶ a number eerily close to the limit set by the
 2 Settlement—namely, 33% of the \$115 million Settlement Fund, or \$37.95 million. Settlement
 3 ¶ 12.1. That near-match gives the Court pause, especially because percentages over 33% are
 4 largely unheard-of with funds of this size. *See Alexander*, 2016 WL 3351017, at *2 (“Although a
 5 percentage award in a megafund case can be 25% or even as high as 30–40%, typically the
 6 percentage award in such a case is substantially less than the 25% benchmark applicable to typical
 7 class settlements in this Circuit.”). Assuming that the expunged 4,459 hours were billed at the
 8 weighted average of \$481.62, ECF No. 916-8 (“Cervantez Decl.”) ¶ 48, the lodestar figure would
 9 have been \$40,141,110.10 or 34.9% of the Settlement Fund. These issues highlight why the
 10 percentage-of-recovery method is preferred in this case.

11 Choosing the percentage-of-recovery method here is consistent with the Ninth Circuit’s
 12 declaration that “where awarding 25% of a ‘megafund’ would yield windfall profits for class
 13 counsel in light of the hours spent on the case, courts should adjust the benchmark percentage or
 14 employ the lodestar method instead.” *In re Bluetooth*, 654 F.3d at 942. In that statement, the
 15 Ninth Circuit expressly recognized that courts need not always “employ the lodestar method” in
 16 megafund cases but may choose to “adjust the benchmark percentage” to achieve a reasonable fee
 17 award. *See id.* Courts have often opted for the lodestar method when the fund is significantly
 18 larger than the \$115 million at issue here. For example, in *In re Washington Public Power Supply*
 19 *System Securities Litigation*, the Ninth Circuit upheld the district court’s decision to calculate the
 20 lodestar for a settlement fund of \$687 million. 19 F.3d 1291, 1297 (9th Cir. 1994). The Ninth
 21 Circuit explained that “[w]ith a fund this large, picking a percentage without reference to all the
 22 circumstances of the case, including the size of the fund, would be like picking a number out of
 23 the air.” *Id.* Here, based on the Court’s familiarity with the case, the choice of a percentage does
 24 not strike the Court as arbitrary or unconnected from the performed work in a way that would

25 ⁶ This figure represents Class Counsel’s submitted lodestar figure of \$38,015,714.00, *see*
 26 Cervantez Reply Decl. ¶ 17, less \$22,147.50 that Class Counsel agree was improperly included,
 27 *see* ECF No. 1037-2 ¶¶ 19, 24. The Court refers to the above \$37,993,566.50 lodestar figure
 28 throughout this order.

1 create a windfall for Class Counsel. Additionally, the Court will also use the lodestar method as a
 2 check on the reasonableness of the percentage-of-recovery award. *See Alexander*, 2016 WL
 3 3351017, at *2 (“[I]n megafund cases, the lodestar cross-check assumes particular importance.”).

4 As such, the Court concludes that using the percentage-of-recovery method with a lodestar
 5 cross-check would achieve the fairest and most reasonable result in this case.

6 **2. Percentage of Recovery**

7 The determination of the percentage of recovery usually proceeds in two steps. First,
 8 courts must ascertain the size of the fund against which the percentage will be assessed. *In re*
 9 *Online DVD-Rental Antitrust Litig.*, 779 F.3d 934, 953 (9th Cir. 2015). Second, courts must
 10 examine relevant factors to determine the appropriate percentage of the fund that should be
 11 awarded to counsel. *Vizcaino*, 290 F.3d at 1048–50.

12 Here, Plaintiffs and Schulman spar over both of these inquiries. With respect to the size of
 13 the fund, Plaintiffs seek to expand the \$115 million Settlement Fund by taking into account certain
 14 nonmonetary benefits, whereas Schulman seeks to contract the \$115 million Settlement Fund by
 15 excluding certain costs. Fee Mot. at 3–6; ECF No. 924 at 11–14. As to the percentage, Plaintiffs
 16 advocate for 33%, while Schulman puts the figure at 15%. Fee Mot. at 1; ECF No. 924 at 4–10.
 17 The Court first addresses the size of the fund, then turns to the percentage.

18 **i. Size of the Fund**

19 The Court begins by resolving the appropriate size of the fund. In this regard, the Court
 20 has discretion to determine what portion of the common fund is “for the benefit of the entire
 21 class.” *In re Bluetooth*, 654 F.3d at 942. Thus, for example, courts may exclude administrative
 22 costs or litigation expenses in appropriate cases. *In re Online DVD-Rental*, 779 F.3d at 953.
 23 Similarly, depending on the circumstances, courts may sometimes add the value of non-monetary
 24 relief to the value of the common fund. *Staton*, 327 F.3d at 974. Importantly, “the reasonableness
 25 of attorneys’ fees is not measured by the choice of the denominator.” *Powers v. Eichen*, 229 F.3d
 26 1249, 1258 (9th Cir. 2000). Rather, courts must ensure that “the end result is reasonable.” *Id.*

1 Here, the starting baseline is the \$115 million Settlement Fund. Plaintiffs argue that the
2 nonmonetary relief provided by the Settlement warrants deviating up from that figure. Schulman
3 counters that the figure is too high because it includes administrative costs and litigation expenses
4 that confer no real benefit on the Class. The Court disagrees with both Plaintiffs and Schulman
5 that any departure from \$115 million is justified. The Court first discusses Plaintiffs' contentions,
6 then discusses Schulman's contentions.

7 Plaintiffs identify two forms of nonmonetary relief that they argue are not captured by the
8 dollar figure of the Settlement Fund. First, Plaintiffs point to the credit monitoring services
9 available to all Settlement Class Members who submit a claim form. Fee Mot. at 3. Plaintiffs
10 note that because they are purchasing these services for a very large group of individuals, the bulk
11 discount is substantial: while the Settlement is likely to secure four years of credit monitoring for
12 all Settlement Class Members for \$26.2 million, ECF No. 1042, Ex. A, the retail price for four
13 years of credit monitoring is approximately \$479.52 (\$9.99 per month) per Settlement Class
14 Member, ECF No. 945 ("Reply") at 4. According to Plaintiffs, the true value of the credit
15 monitoring for the entire Class is approximately \$37.95 billion (\$479.52 x 79.15 million). More
16 conservatively, Plaintiffs look to the actual number of Settlement Class Members who have
17 claimed credit monitoring services. *Id.* at 4–5. Using current figures, the resulting value is
18 approximately \$602.85 million (\$479.52 x 1,257,208). Those numbers would be even higher if
19 the retail value for the fraud resolution services were added. *Id.* at 5.

20 Plaintiffs' suggested methodology is too simplistic and does not capture actual value to the
21 Settlement Class Members. Although Plaintiffs argue that their approach is supported by
22 *Johansson-Dohrmann v. Cbr Systems, Inc.*, little can be gleaned from that case because the parties
23 there agreed on the valuation of the settlement fund. No. 12-CV-01115-MMA, 2013 WL
24 3864341, at *2 (S.D. Cal. July 24, 2013). Plaintiffs' methodology is problematic in multiple
25 regards. For instance, Plaintiffs presume that each subsequent month and year of credit
26 monitoring is worth the same to Settlement Class Members, even though Plaintiffs' own expert

1 opined that the need for such services diminishes with time. ECF 744-24 (“Van Dyke Report”)
 2 ¶ 46. More fundamentally, the error in Plaintiffs’ method is that treating credit monitoring as
 3 equivalent to cash conflicts with the general principle that “compensation in kind is worth less
 4 than cash of the same nominal value.” *In re Mex. Money Transfer Litig.*, 267 F.3d 743, 748 (7th
 5 Cir. 2001). Although the credit monitoring services under the Settlement are tailored to the
 6 Settlement Class’s injury, Reply at 5–6, the estimated retail price is at best an inexact match to the
 7 actual value. That fact helps to explain why Plaintiffs derive exorbitant numbers that far exceed
 8 the cash value of the Settlement Fund itself. In fact, if Plaintiffs’ numerical figures were accepted,
 9 those figures might call into question whether all Settlement Class Members are treated fairly
 10 under the Settlement. These critical issues are sufficient to discard Plaintiffs’ proposed
 11 quantification. Because Plaintiffs offer no other way to measure the actual value of credit
 12 monitoring, the Court will not adjust the fund for calculation of the percentage of recovery.

13 Second, Plaintiffs cite to the Settlement provision requiring Anthem to almost triple its
 14 cybersecurity spending for three years. Fee Mot. at 5. Plaintiffs correctly explain that these
 15 business-practice changes benefit the entire Class because Anthem must take specific steps to
 16 protect its data warehouse (which still stores the personal information of Settlement Class
 17 Members) from future breach. *Id.* Nevertheless, Plaintiffs again provide no sound methodology
 18 for measuring the value of those changes to Settlement Class Members.

19 The Ninth Circuit has held that “only in the unusual instance where the value to individual
 20 class members of benefits deriving from injunctive relief can be accurately ascertained may courts
 21 include such relief as part of the value of a common fund for purposes of applying the percentage
 22 method of determining fees.” *Staton*, 327 F.3d at 974. Plaintiffs do not meet that standard here.
 23 Plaintiffs propose that the Court add to the fund an amount equal to the difference between
 24 Anthem’s post-Settlement and pre-Settlement spending on cybersecurity multiplied by three years.
 25 Fee Mot. at 5–6. This procedure rests on a faulty premise—namely, it assumes that every dollar
 26 Anthem spends on cybersecurity above pre-breach levels equals one dollar to the Class. The flow

1 of benefits is not that direct, which is a problem for Plaintiffs because “the standard is not how
2 much money a company spends on purported benefits, but the value of those benefits to the class.”
3 *In re TD Ameritrade Accountholder Litig.*, 266 F.R.D. 418, 423 (N.D. Cal. 2009). Moreover, it is
4 difficult to isolate which portion of Anthem’s increase in its cybersecurity spending is attributed
5 solely to the instant lawsuit as opposed to money that Anthem would have spent anyway in the
6 aftermath of the data breach at issue. Because Plaintiffs have not established any “accurately
7 ascertained” value, the Court elects to consider the value of this nonmonetary relief as “a ‘relevant
8 circumstance’ in determining what percentage of the common fund class counsel should receive as
9 attorneys’ fees, rather than as part of the fund itself.” *Staton*, 327 F.3d at 974.

10 Having addressed and rejected Plaintiffs’ contentions about the size of the fund, the Court
11 now takes up Schulman’s contentions. Schulman seeks to exclude both the administrative costs
12 and litigation expenses from the percentage fund. ECF No. 924 at 11–14. He argues that
13 Settlement Class Members receive no benefit from these expenses. *Id.* at 12–13. Schulman
14 contends that exclusion is particularly warranted here because the administrative costs were high
15 (\$23.0 million) and Class Counsel had little incentive to optimize the administrative process. *Id.*
16 at 13–14. The Court disagrees.

17 As noted above, in the Ninth Circuit, district courts have latitude to calculate the
18 percentage of recovery based on the gross or net Settlement Fund. *Powers*, 229 F.3d at 1258.
19 Thus, the Ninth Circuit has repeatedly held that district courts do not abuse their discretion by
20 including the costs of providing notice to the class (or other administrative costs and litigation
21 expenses) as part of the percentage fund valuation. *See In re Online DVD-Rental*, 779 F.3d at 953;
22 *Staton*, 327 F.3d at 974–75.

23 Here, the Court concludes that litigation expenses and administrative costs should be
24 included. As to the former, the litigation expenses were necessary to litigate this case and “make
25 the entire action possible.” *In re Online DVD-Rental*, 779 F.3d at 953. As to the latter, investing
26 in a comprehensive notice and claims processing effort was critical to inform the approximately

1 79.15 million Settlement Class Members about the Settlement and their ability to seek
 2 reimbursement for their losses. *See id.* (explaining that notice and administrative costs allow class
 3 members to learn about the settlement and receive distributions). It is true that the administration
 4 has been costly in this case (reaching \$23.0 million, or 20% of the \$115 million Settlement Fund),
 5 but much of that amount (over \$14.0 million) is attributable to postage for mailing notice to more
 6 than 54 million Settlement Class Members with known addresses. ECF No. 944-14 ¶¶ 2, 4. Such
 7 direct notice is typically the preferred form of notification because of its efficacy. *See Lilly v.*
 8 *Jamba Juice Co.*, 308 F.R.D. 231, 239 (N.D. Cal. 2014). To reach the remainder of the Settlement
 9 Class Members, the Settlement Administrator used less-expensive forms of notice, including
 10 notice by email, print publication, and online advertisement. ECF No. 916-32 ¶¶ 13–15. The
 11 Settlement Administrator estimates that “the combined individual and media notice efforts reached
 12 approximately 87.5% of likely class members on average 2.1 times each.” *Id.* ¶ 16. These costs
 13 “of providing notice to the class can reasonably be considered a benefit to the class” in this case.
 14 *Staton*, 327 F.3d at 975.

15 The same is true of the other administrative costs (such as processing claim forms and
 16 operating a call center to answer Settlement Class Members’ questions) that contribute to
 17 “distribut[ing] [the] settlement award in a meaningful and significant way.” *In re Online DVD-*
 18 *Rental*, 779 F.3d at 953 (internal quotation marks omitted). The Court has supervised the form of
 19 notice, modes of communication, and forms of administration to reassure that costs are contained.
 20 *Staton*, 327 F.3d at 975. Thus, the Court finds that including these non-excessive administrative
 21 costs and litigation expenses in the percentage fund is proper in this case.

22 In sum, the Court refuses to depart upward or downward from the \$115 million Settlement
 23 Fund based on the nonmonetary benefits of the Settlement or the administrative costs and
 24 litigation expenses. Instead, the Court will use the \$115 million figure and make a final
 25 determination of a reasonable percentage and attorneys’ fee award. Accordingly, the Court’s task
 26 is to compute a suitable percentage.

1 **ii. Percentage**

2 The determination of an appropriate percentage requires careful consideration of all of the
3 circumstances of a case. The Ninth Circuit has characterized 25% as the “starting point” for the
4 analysis but simultaneously noted that 25% may not be fitting in all cases. *Vizcaino*, 290 F.3d at
5 1048. For example, “where awarding 25% of a ‘megafund’ would yield windfall profits for class
6 counsel in light of the hours spent on the case, courts should adjust the benchmark percentage.” *In*
7 *re Bluetooth*, 654 F.3d at 942. Similarly, district courts may depart from the 25% benchmark rate
8 by “providing adequate explanation in the record of any ‘special circumstances.’” *Id.* In the end,
9 “[s]election of the benchmark or any other rate must be supported by findings that take into
10 account all of the circumstances of the case.” *Vizcaino*, 290 F.3d at 1048. The Ninth Circuit has
11 identified five factors which may be probative: (1) the results achieved; (2) the risk of litigation;
12 (3) the skill required and the quality of work; (4) the contingent nature of the fee and the financial
13 burden carried by the plaintiffs; and (5) awards made in similar cases. *See id.* at 1048–50.

14 Here, Plaintiffs seek an upward departure from the 25% benchmark to 33% of the common
15 fund, for a total of \$37.95 million in attorneys’ fees. Fee Mot. at 1. Schulman seeks to have the
16 Court select 15%, ECF No. 924 at 4–10, resulting in an attorneys’ fees award of \$17.25 million
17 when applied to the \$115 million Settlement Fund. As set forth below, the Court believes that,
18 particularly in light of the substantial results achieved in this case and the risks associated with the
19 litigation, the factors set forth in *Vizcaino* weigh in favor of granting Class Counsel an upward
20 adjustment. However, the Court finds that a percentage award of 27% of the common fund is
21 appropriate, rather than the 33% requested by Class Counsel.

22 **a. The Results Achieved**

23 First, the Court considers the overall result and benefit to the Class. This factor has been
24 called “the most critical factor in granting a fee award.” *In re Omnivision Techs., Inc.*, 559 F.
25 Supp. 2d 1036, 1046 (N.D. Cal. 2008); *see also Hensley v. Eckerhart*, 461 U.S. 424, 436 (1983)
26 (noting that “the most critical factor” in determining the reasonableness of an attorneys’ fees

1 request is “the degree of success obtained”). Having seen the strengths and weaknesses in each
2 side’s case throughout litigation over the past three years, the Court finds that the results obtained
3 in the Settlement are exceptional.

4 Whether one looks at absolute or per-capita numbers, a settlement fund of \$115 million for
5 approximately 79.15 million class members is significant. According to the parties, the gross
6 settlement amount of \$115 million constitutes the largest settlement to date in a data-breach case
7 in the United States. They point to settlements approved in two consumer class actions involving
8 data breaches—namely, the \$27.2 million settlement fund (for over 52 million consumers) in the
9 Home Depot data breach and the \$23.3 million settlement fund (for approximately 110 million
10 consumers) in the Target data breach. *See Cervantez Reply Decl., Ex. B.* However, the Court
11 notes that these settlement figures for the consumer cases in the Home Depot and Target data
12 breaches are not perfect comparators because they represent a small fraction of what the
13 defendants paid as a result of the data breaches. Both Home Depot and Target engaged in large
14 settlements with separate classes of financial institutions and even larger settlements with credit
15 card companies, such as Visa and MasterCard, and their issuers outside of court litigation. These
16 additional settlements also conferred benefits, either directly or indirectly, on the consumers.

17 In *In re Target*, in addition to the consumer class settlement, there was a \$39 million
18 settlement with a separate class of financial institutions. Memorandum of Law in Support of
19 Financial Institution Plaintiffs’ Motion for Final Approval of Class Action Settlement at 2, *In re*
20 *Target*, No. 14-MD-02522-PAM (D. Minn. Apr. 11, 2016), ECF No. 745. In *In re The Home*
21 *Depot*, in addition to the consumer class settlement, there was a separate settlement with a class of
22 financial institutions that included a \$25 million fund plus up to \$2.25 million in additional funds.
23 Final Order and Judgment at 3–5, *In re The Home Depot*, No. 14-MD-02583-TWT (N.D. Ga.
24 Sept. 22, 2017), ECF No. 343. The financial institution settlement also required Home Depot to
25 implement specific data security measures beyond those in the consumer settlement. *Id.* at 5.
26 These financial institution settlements benefitted consumers, as the harms suffered by the financial

1 institutions included “costs to cancel and reissue cards compromised in the data breach, costs to
2 refund fraudulent charges, costs to investigate fraudulent charges, [and] costs for customer fraud
3 monitoring.” Opinion and Order at 11, *In re The Home Depot*, No. 14-MD-02583-TWT (N.D.
4 Ga. May 18, 2016), ECF No. 211; *see also* Memorandum of Law in Support of Financial
5 Institution Plaintiffs’ Motion for Final Approval of Class Action Settlement at 1, *In re Target*, No.
6 14-MD-02522-PAM (“Credit and debit card issuers claimed they incurred massive costs to cover
7 fraud losses and card reissuance expenses after customers used the cards at Target.”).
8 Additionally, Home Depot and Target both entered into much larger settlements with credit card
9 companies, such as Visa and MasterCard, and their issuers outside of court litigation. *See, e.g.*,
10 Hadley Malcolm, *Target settles with Visa over data breach*, USA Today (Aug. 18, 2015 1:54
11 p.m.), [https://www.usatoday.com/story/money/2015/08/18/target-settles-visa-over-data-](https://www.usatoday.com/story/money/2015/08/18/target-settles-visa-over-data-breach/31911123)
12 [breach/31911123](https://www.usatoday.com/story/money/2015/08/18/target-settles-visa-over-data-breach/31911123) (stating that Target entered into a \$67 million settlement with Visa and was
13 working on a similar settlement with MasterCard); *Home Depot Settles Data Breach Suit for*
14 *\$25M*, Lexology (Mar. 30, 2017), [https://www.lexology.com/library/detail.aspx?g=12388973-](https://www.lexology.com/library/detail.aspx?g=12388973-7b1a-42ae-a32a-f00d8c59e7ea)
15 [7b1a-42ae-a32a-f00d8c59e7ea](https://www.lexology.com/library/detail.aspx?g=12388973-7b1a-42ae-a32a-f00d8c59e7ea) (“Home Depot . . . obtained releases from some MasterCard and
16 Visa issuers, paying out \$14.5 million in premiums on top of more than \$140 million in payments
17 to the larger issuers under the card brand recovery processes.”). In sum, because Home Depot and
18 Target entered into multiple settlements with various retail actors and all of those settlements
19 confer some benefit on the consumers, the consumer-only settlements are not perfect comparators.
20 Nevertheless, the Court concludes that the \$115 million fund here is a substantial result.

21 The \$115 million fund also compares favorably to Plaintiffs’ valuation of their own claims.
22 Under one plausible damages theory employing the black market price of personal information,
23 Plaintiffs’ expert indicated that damages could be valued at \$10 per individual. ECF No. 743-11
24 at 13. Using that figure, the \$115 million Settlement Fund represents 14.5% of the projected
25 recovery that Settlement Class Members would be entitled to if they prevailed. *See, e.g.*,
26 *Betancourt v. Advantage Human Resourcing, Inc.*, No. 14-CV-01788-JST, 2016 WL 344532, at

1 *5 (N.D. Cal. Jan. 28, 2016) (evaluating a settlement providing 9.7% of the total potential
2 recovery); *Stovall-Gusman v. W.W. Granger, Inc.*, No. 13-CV-02540-HSG, 2015 WL 3776765, at
3 *4 (N.D. Cal. June 17, 2015) (evaluating a settlement providing 10% of the total potential
4 recovery). For those Settlement Class Members claiming an alternative cash payment, their
5 payout looks to be \$50, ECF No. 1042, Ex. A, an amount that exceeds \$10. This does not even
6 take into account that the Settlement Class Members may also claim up to \$10,000 for any out-of-
7 pocket costs incurred because of the breach. Settlement ¶ 6.4.

8 Moreover, the \$115 million fund does not represent the entire value to the Class because
9 the Settlement also offers nonmonetary benefits. As described above, Plaintiffs failed to provide a
10 sound method to quantify the value of the fraud resolution services provided to all Settlement
11 Class Members, the credit monitoring services provided to Settlement Class Members who submit
12 a claim, or the Settlement-mandated cybersecurity spending that Anthem must undertake.
13 However, even if this nonmonetary relief does not form part of the percentage fund, the Court may
14 consider its value as “a ‘relevant circumstance’ in determining what percentage of the common
15 fund class counsel should receive as attorneys’ fees.” *Staton*, 327 F.3d at 974.

16 These three nonmonetary forms of relief further underscore that Class Counsel achieved an
17 impressive benefit for the Class. The Court finds that the fraud resolution services (available to all
18 Settlement Class Members) and the credit monitoring services (available to Settlement Class
19 Members who submit a claim) are certainly worth more to individual Settlement Class Members
20 than the discounted rate paid for the services in bulk. In particular, these services are aimed at
21 combatting the precise harm that Settlement Class Members allegedly suffered. Moreover, the
22 services are likely to last at least four years, ECF No. 1042, Ex. A, covering the period during
23 which the risk of identity theft is at its highest, Van Dyke Report ¶ 46, with only a short gap after
24 the expiration of Anthem’s two years of credit monitoring.

25 Likewise, the obligatory changes to Anthem’s business practice also provide value beyond
26 the \$115 million Settlement Fund. Specifically, Anthem must nearly triple its annual spending on

1 data security for the next three years and implement cybersecurity controls and reforms
 2 recommended by Plaintiffs' cybersecurity experts. Settlement ¶ 2. Thus, Anthem must fix core
 3 vulnerability issues in its database warehouse, changes which redound to the benefit of those
 4 Settlement Class Members whose personal information is still stored on Anthem's data
 5 warehouse. Cervantez Decl. ¶ 11. Not only does this nonmonetary relief benefit the millions of
 6 Settlement Class Members, but it also creates a public benefit beyond the Class for new Anthem
 7 members. *See Vizcaino*, 290 F.3d at 1049 (considering benefits to non-class members).

8 Class Counsel's expedient resolution of the case further solidifies the value of these
 9 nonmonetary forms of relief. For example, Plaintiffs' expert explained that the need for credit
 10 monitoring is most important for the five years following a data breach because the risk of identity
 11 theft is heightened during that period. Van Dyke Report ¶ 46. In a similar vein, changes in
 12 cybersecurity are more effective the earlier that they are implemented. Class Counsel were able to
 13 respect and address that time sensitivity here. The data breach occurred in late 2014 and early
 14 2015. FCAC ¶ 1. Class Counsel were appointed in this MDL on September 11, 2015 and filed
 15 the motion for preliminary approval less than two years later, on June 23, 2017. ECF Nos. 284,
 16 869. Accordingly, the results achieved on behalf of the Class, including the nonmonetary relief,
 17 heavily weigh in favor of granting Class Counsel's request for a fee award of more than 25%.

18 **b. The Risks of Litigation**

19 Second, the Court concludes that there were substantial risks of litigation. To begin, data-
 20 breach litigation is an actively developing field of the law where much of the legal landscape is
 21 still shifting and unsettled. This baseline uncertainty manifested itself in a threshold question that
 22 threatened to end the litigation at an early stage as well as ongoing issues that endangered class
 23 recovery.

24 When Plaintiffs initiated this litigation, it was not a foregone conclusion that they had
 25 suffered an injury-in-fact sufficient to confer Article III standing to sue. Plaintiffs' entire case—or
 26 at least large swaths of the case—depended upon the assertion that an imminent risk that hackers

1 will misuse the data obtained in the breach constitutes an injury-in-fact. On September 4, 2014,
2 this Court resolved that issue in favor of standing in a separate case before the instant case began.
3 See ECF No. 468 at 46–47 (citing *In re Adobe Sys., Inc. Privacy Litig.*, 66 F. Supp. 3d 1197,
4 1211–16 (N.D. Cal. 2014)). The Ninth Circuit had also concluded in 2010 that plaintiffs had
5 standing in a case involving similar facts. See *Krottner v. Starbucks Corp.*, 628 F.3d 1139, 1140–
6 43 (9th Cir. 2010). However, the Ninth Circuit had not explicitly addressed standing in the
7 context of a data breach or confirmed that its 2010 decision remained good law in light of the U.S.
8 Supreme Court’s intervening decision in *Clapper v. Amnesty International USA*, 568 U.S. 398
9 (2013), on February 26, 2013. The outcome was far from certain, as the circuits have reached
10 different answers on the issue of standing in various data-breach cases presenting different facts.
11 Compare, e.g., *Attias v. Carefirst, Inc.*, 865 F.3d 620, 626 (D.C. Cir. 2017) (finding standing),
12 *cert. denied*, 138 S. Ct. 981 (2018), and *Lewert v. P.F. Chang’s China Bistro, Inc.*, 819 F.3d 963,
13 967 (7th Cir. 2016) (same), with *In re SuperValu, Inc.*, 870 F.3d 763, 770 (8th Cir. 2017) (finding
14 no standing), and *Beck v. McDonald*, 848 F.3d 262, 274 (4th Cir.) (same), *cert. denied sub nom.*
15 *Beck v. Shulkin*, 137 S. Ct. 2307 (2017). Earlier this year, the Ninth Circuit reaffirmed that “the
16 sensitivity of the personal information, combined with its theft, [can be sufficient] to conclude that
17 the plaintiffs had adequately alleged an injury in fact supporting standing.” *In re Zappos.com,*
18 *Inc.*, 888 F.3d 1020, 1027 (9th Cir. 2018). Before that ruling, Plaintiffs faced the possibility that
19 their lawsuit would be unsustainable or severely trimmed on the ground that Plaintiffs lacked
20 Article III standing to sue.

21 Other risks remained for the litigation moving forward. For example, class certification
22 was not guaranteed, in part because Plaintiffs had a scarcity of precedent to draw on. The parties
23 represent that only one non-settlement data-breach class has been certified in federal court to date,
24 and that case post-dates Plaintiffs’ filing of their motion for class certification. See *Smith v. Triad*
25 *of Ala., LLC*, No. 14-CV-00324-WKW, 2017 WL 1044692, at *16 (M.D. Ala. Mar. 17, 2017).
26 Moreover, multiple federal courts around the country had denied bids to certify classes in data-

1 breach cases. *See, e.g., In re Hannaford Bros. Co. Customer Data Sec. Breach Litig.*, 293 F.R.D.
2 21, 35 (D. Me. 2013) (denying class certification in data-breach case); *In re TJX Companies Retail*
3 *Sec. Breach Litig.*, 246 F.R.D. 389, 401 (D. Mass. 2007) (same). Thus, Plaintiffs had to contend
4 with the possibility that their class certification motion would be denied in whole or in part.

5 Plaintiffs also faced potential challenges on the merits of their claims. Plaintiffs presented
6 novel legal issues about the scope of certain state privacy statutes and about the viability of certain
7 damages theories. ECF No. 468 at 59 (noting that “this action presents an issue of first
8 impression” about a state-law disclosure requirement); *id.* at 45 (observing that no New York state
9 or federal courts had addressed issues about one of Plaintiffs’ damages theories). Although these
10 issues survived motions to dismiss, they remain untested outside of the pleading stage. Even as to
11 the more mainstream issues that Plaintiffs’ lawsuit entails, Anthem had strong defenses on the
12 merits. Most prominently, Anthem’s security program and response to the breach have been
13 praised by industry experts. In fact, a consortium of state insurance commissioners specifically
14 found that Anthem’s pre-breach cybersecurity was reasonable. Cervantez Decl., Ex. 14 ¶ A.5.
15 Courts have stated that “[t]he risk of litigation is . . . affected by the availability of a prior
16 judgment or decree in a related case brought by the government or a governmental agency.” *In re*
17 *Equity Funding Corp. of Am. Sec. Litig.*, 438 F. Supp. 1303, 1332 (C.D. Cal. 1977). Anthem also
18 would have continued to contest other core issues such as causation, damages, and the scope of its
19 promises to protect Plaintiffs’ personal information. Plaintiffs had many responses to these
20 arguments but faced the risk of possible negative findings on liability or damages.

21 These risks are compounded by the robust opposition from Defendants. Given the massive
22 size of the putative class, Defendants had a powerful incentive to devote considerable resources to
23 this litigation and have zealously litigated the action since its inception. Although Plaintiffs were
24 largely successful at the motion-to-dismiss stage, Defendants continued to dispute their liability.
25 Along the same lines, Defendants filed briefs opposing class certification and raising challenges to
26

1 Plaintiffs' experts. These issues threatened to defeat or diminish Plaintiffs' possible recovery, and
2 the Court had not yet ruled on class certification when the parties reached a settlement.

3 However, Plaintiffs likely overstate the riskiness to some extent. The fact that this Court
4 received 18 separate motions to serve as lead counsel in this action, ECF No. 284 at 1–2, is
5 evidence that the litigation was not as risky as Plaintiffs suggest. The Court would not expect to
6 have such intense competition among experienced lawyers to undertake the case on a contingency-
7 fee basis if the case did not hold a sufficiently certain prospect of a sizeable recovery. *See Razilov*
8 *v. Nationwide Mut. Ins. Co.*, No. 01-CV-01466-BR, 2006 WL 3312024, at *2 (D. Or. Nov. 13,
9 2006) (“[T]here was a favorable outlook of recovery sufficient for seasoned counsel to undertake
10 the case on behalf of Plaintiffs and the class members on a contingency-fee basis.”); *see also*
11 *Silverman v. Motorola Sols., Inc.*, 739 F.3d 956, 958 (7th Cir. 2013) (“Lack of competition not
12 only implies a higher fee but also suggests that most members of the . . . bar saw this litigation as
13 too risky for their practices.”). Nevertheless, Plaintiffs have identified uniquely potent risks in this
14 case that Plaintiffs would have to overcome to reach a favorable result this lawsuit. Accordingly,
15 the risks attendant to maintaining this litigation weigh in favor of granting Class Counsel’s request
16 for a fee award of more than 25% but less strongly than Plaintiffs suggest.

17 **c. The Skill Required and the Quality of Work**

18 Third, with respect to the quality of the litigation, Class Counsel include some lawyers
19 who are experienced in litigating data-breach and privacy class actions. ECF No. 284 at 2–3.
20 While the Court does not have enough information to comment on the work performed by the 49
21 other law firms that Class Counsel brought into this case, the Court concludes that Class Counsel
22 demonstrated skillful preparation and adept work. They performed significant factual
23 investigation prior to bringing these actions; engaged in motion practice, including opposing two
24 motions to dismiss and fully briefing a motion for class certification and reply; engaged in written
25 discovery; and participated in protracted negotiations with Anthem, including three full-day
26 mediations with the assistance of a capable and experienced mediator.

United States District Court
Northern District of California

1 Moreover, the case presents complexities that required skill from the prosecuting attorneys.
2 Plaintiffs asserted claims under all fifty states’ laws against 43 defendants on behalf of
3 approximately 79.15 million class members. *See generally* FCAC. The subject matter is highly
4 technical, including facts about Anthem’s cybersecurity and industry best practices. Cervantez
5 Decl. ¶ 40. Adding to that complexity, Class Counsel also had to become familiar with Anthem’s
6 business models and various insurance products as well as the risks associated with the theft of
7 personal information and the most effective remedies to prevent fraud. *Id.* ¶ 41–42. The parties
8 planned to employ ten expert witnesses in the case. This Court and other courts within this district
9 have recognized that litigating complicated matters, especially unprecedented issues, is a
10 circumstance that points in favor of a larger percentage. *Spears v. First Am. Eappraiseit*, No. 08-
11 CV-00868-RMW, 2015 WL 1906126, at *2 (N.D. Cal. Apr. 27, 2015) (awarding 35% of
12 \$7,557,096.92 net settlement fund in a case where class counsel “faced at least three significant
13 novel issues of law”); *Hopkins v. Stryker Sales Corp.*, No. 11-CV-02786-LHK, 2013 WL 496358,
14 at *2 (N.D. Cal. Feb. 6, 2013) (explaining that counsel’s use of experts to help evaluate case was
15 part of “skillful preparation” that demonstrated skill and quality of work).

d. The Contingent Nature of the Representation

17 Fourth, this case was conducted on a contingent-fee basis against well-represented
18 Defendants. To be sure, Class Counsel were capable of fronting the costs, but the financial risk of
19 litigation was assumed by Class Counsel throughout the pendency of the action. Moreover, the
20 representation has lasted for nearly three years and the case schedule was compressed, thereby
21 requiring Class Counsel to forego work on other matters. *See In re Online DVD-Rental*, 779 F.3d
22 at 955 (noting that this factor considers “the burdens class counsel experienced while litigating the
23 case (e.g., cost, duration, foregoing other work)”).

e. Awards in Similar Cases

25 Fifth, a 27% award is consistent with attorneys’ fees awards made in similar cases.
26 Plaintiffs rely heavily on two settlements of consumer class actions stemming from the Home

1 Depot and Target data breaches. Fee Mot. at 15–16. The Court notes, as it did above in
2 discussing the results achieved in the instant case, that Plaintiffs’ comparison is at best incomplete
3 because Home Depot’s and Target’s settlements of the consumer claims do not represent the entire
4 sum that those companies paid or the entire benefit that the consumers received as a result of the
5 respective data breaches. Instead, both Home Depot and Target engaged in large settlements with
6 separate classes of financial institutions and even larger settlements with credit card companies,
7 such as Visa and MasterCard, and their issuers outside of court litigation. These additional
8 settlements also conferred benefits, either directly or indirectly, on the consumers.

9 Specifically, in *In re Target*, in addition to the consumer class settlement, there was a \$39
10 million settlement with a separate class of financial institutions. Memorandum of Law in Support
11 of Financial Institution Plaintiffs’ Motion for Final Approval of Class Action Settlement at 2, *In re*
12 *Target*, No. 14-MD-02522-PAM. In *In re The Home Depot*, in addition to the consumer class
13 settlement, there was a separate settlement with a class of financial institutions that included a \$25
14 million fund plus up to \$2.25 million in additional funds. Final Order and Judgment at 3–5, *In re*
15 *The Home Depot*, No. 14-MD-02583-TWT. The financial institution settlement also required
16 Home Depot to implement specific data security measures beyond those in the consumer
17 settlement. *Id.* at 5. These financial institution settlements benefitted consumers, as the harms
18 suffered by the financial institutions included “costs to cancel and reissue cards compromised in
19 the data breach, costs to refund fraudulent charges, costs to investigate fraudulent charges, [and]
20 costs for customer fraud monitoring.” Opinion and Order at 11, *In re The Home Depot*, No. 14-
21 MD-02583-TWT; *see also* Memorandum of Law in Support of Financial Institution Plaintiffs’
22 Motion for Final Approval of Class Action Settlement at 1, *In re Target*, No. 14-MD-02522-PAM
23 (“Credit and debit card issuers claimed they incurred massive costs to cover fraud losses and card
24 reissuance expenses after customers used the cards at Target.”). Additionally, Home Depot and
25 Target both entered into much larger settlements with credit card companies, such as Visa and
26 MasterCard, and their issuers outside of court litigation. *See, e.g.,* Hadley Malcolm, *Target settles*

1 with Visa over data breach, USA Today (Aug. 18, 2015 1:54 p.m.), [https://www.usatoday.com/](https://www.usatoday.com/story/money/2015/08/18/target-settles-visa-over-data-breach/31911123)
2 [story/money/2015/08/18/target-settles-visa-over-data-breach/31911123](https://www.usatoday.com/story/money/2015/08/18/target-settles-visa-over-data-breach/31911123); *Home Depot Settles Data*
3 *Breach Suit for \$25M*, Lexology (Mar. 30, 2017), [https://www.lexology.com/library/](https://www.lexology.com/library/detail.aspx?g=12388973-7b1a-42ae-a32a-f00d8c59e7ea)
4 [detail.aspx?g=12388973-7b1a-42ae-a32a-f00d8c59e7ea](https://www.lexology.com/library/detail.aspx?g=12388973-7b1a-42ae-a32a-f00d8c59e7ea).

5 Nonetheless, the Court provides the district courts' rationales for awarding percentages
6 slightly higher than 27% in the consumer portion of those cases. First, in the case involving the
7 Home Depot data breach, the district court approved the attorneys' fees request for \$7,536,497, or
8 27.7% of the \$27.2 million settlement fund. Order Granting Consumer Plaintiffs' Motion for
9 Service Awards, Attorneys' Fees and Litigation Expense Reimbursement at 1, 4, *In re The Home*
10 *Depot, Inc., Customer Data Sec. Breach Litig.*, No. 14-MD-02583-TWT (N.D. Ga. Aug. 23,
11 2016), ECF No. 261. The court explained that "[t]he relief obtained for the Settlement Class
12 compares very favorably to the other data breach settlements presented to the Court, and appears
13 to be the most comprehensive settlement achieved in large-scale data breach litigation." *Id.* at 3.
14 The court noted that "Class Counsel took exceptional litigation risks in devoting the amount of
15 time and resources which they did." *Id.* at 3–4. Finally, the court added that its analysis did not
16 include the value of the identity theft monitoring services provided to the class or the "substantial
17 but unquantifiable value of the injunctive relief." *Id.* at 4. Second, in the case involving the
18 Target data breach, the district court awarded \$6.75 million in attorneys' fees, a figure
19 representing 29% of the \$23.3 million value of the settlement. Memorandum and Order at 6, 8, *In*
20 *re Target Corp. Customer Data Sec. Breach Litig.*, No. 14-MD-02522-PAM (D. Minn. Nov. 17,
21 2015), ECF No. 645. The court there noted that the case had been "hard-fought and heavily
22 litigated since its inception" and the fee request was "reasonable in light of complexities and
23 vagaries of th[e] case." *Id.* at 8.

24 However, it is important to underscore the size of the fund at issue here. The fund of \$115
25 million is significantly larger than the \$27.2 million settlement fund for the consumer class in *In re*
26 *The Home Depot* and the \$23.3 million settlement value for the consumer class in *In re Target*.

1 “Although a percentage award in a megafund case can be 25% or even as high as 30–40%,
2 typically the percentage award in such a case is substantially less than the 25% benchmark
3 applicable to typical class settlements in this Circuit.” *Alexander*, 2016 WL 3351017, at *2. This
4 rule reflects the basic reality that, at some point, the increasing amount of a settlement may be a
5 function of class size, not counsel’s efforts. *See In re NASDAQ Mkt.-Makers Antitrust Litig.*, 187
6 F.R.D. 465, 486 (S.D.N.Y. 1998). Although percentages tend to decrease as the fund increases,
7 the Ninth Circuit has rejected the argument that fee award percentages must decrease as the fund
8 increases. *Vizcaino*, 290 F.3d at 1047. A simple example demonstrates the perverse incentives
9 that may result by following such a formulaic approach: If courts award class counsel 30% of any
10 settlement under \$100 million but only 20% of any settlement over \$100 million, then class
11 counsel will prefer to settle cases for \$90 million (i.e., a \$27 million fee award) instead of \$125
12 million (i.e., a \$25 million fee award). *See* Pls.’ Resp. at 2 n.1. The Court need not adjust the
13 benchmark unless “awarding 25% of a ‘megafund’ would yield windfall profits for class counsel
14 in light of the hours spent on the case.” *In re Bluetooth*, 654 F.3d at 942; *see also Allen v.*
15 *Bedolla*, 787 F.3d 1218, 1224 n.4 (9th Cir. 2015) (cautioning that district courts “should not
16 calculate fees using ‘a mechanical or formulaic approach that results in an unreasonable reward’”
17 (quoting *In re Bluetooth*, 654 F.3d at 944)).

18 Indeed, Class Counsel have pointed to other “megafund” cases in which courts have
19 granted similar percentages. In *Vizcaino*, the Ninth Circuit conducted a survey of attorneys’ fees
20 awards in common-fund cases ranging from \$50–200 million between 1996 and 2001. *See* 290
21 F.3d at 1052–54. While the awards ranged from 3% to 40%, in the vast majority of cases (27 of
22 34, or 79%), the percentage ranged from 10% to 30%. *Id.* at 1050 n.4. In a “bare majority” of
23 cases (19 of 34, or 56%), the percentage was in the 20% to 30% range. *Id.* Thus, a percentage of
24 27% appears to be in line with the vast majority of megafund settlements. Indeed, the Ninth
25 Circuit considered only one case from this district with a settlement amount greater than \$100
26 million; in that case, Judge Breyer approved a fee award of \$40 million from a settlement fund of

1 \$137 million (i.e., a percentage of 29.2%). *See id.* at 1052 (citing *In re Informix Corp. Sec. Litig.*,
2 No. 97-CV-01289-CB (N.D. Cal. Nov. 23, 1999)). A 27% award here is likewise consistent with
3 that case.

4 Another source similarly supports this result. This Court has previously relied on a leading
5 study conducted by Theodore Eisenberg and Geoffrey Miller, in which the authors reviewed large
6 common-fund settlements over a 16-year period, between 1993 and 2008. *See In re High-Tech*
7 *Emp. Antitrust Litig.*, No. 11-CV-02509-LHK, 2015 WL 5158730, at *13 (N.D. Cal. Sept. 2,
8 2015) (citing Theodore Eisenberg & Geoffrey P. Miller, *Attorney Fees and Expenses in Class*
9 *Action Settlements: 1993–2008*, 7 J. Empirical Legal Stud. 248 (2010)). In *In re High-Tech*, the
10 Court looked to the authors’ analysis of common funds exceeding \$175.5 million and concluded
11 that a percentage recovery of 10.5% was appropriate for a fund of \$435 million. *Id.* Relevant
12 here, the authors analyzed fee awards based on a sample of 69 settlements ranging from \$69.6–
13 175.5 million and found that the median percentage was 19.9% and the mean percentage was
14 19.4% with a standard deviation of 8.4%. Eisenberg & Miller, *supra*, at 265 tbl.7. This case
15 involves a settlement fund of \$115 million, which falls within the \$69.6–175 million range. While
16 an award of 27% exceeds the 19.4% mean and 19.9% median figures in the authors’ study, the
17 variance is not remarkably large, as 27% falls within one standard deviation (8.4%) of the mean.
18 The fact that 27% falls at the high end of one standard deviation is representative of the
19 exceptionality of this case in terms of both the results achieved and the risks incurred.

20 **iii. Conclusion**

21 Based on the foregoing, the Court concludes that a percentage of 27% should be applied to
22 the \$115 million Settlement Fund. Accordingly, the percentage-of-recovery method produces a
23 total attorneys’ fee award of \$31.05 million.

24 With that figure in hand, the Court next performs a lodestar calculation as a means of
25 cross-checking that result.

3. Lodestar Cross-Check

As noted above, courts calculate a lodestar “by multiplying the number of hours the prevailing party reasonably expended on the litigation (as supported by adequate documentation) by a reasonable hourly rate for the region and for the experience of the lawyer.” *In re Bluetooth*, 654 F.3d at 941 (citing *Staton*, 327 F.3d at 965). Although “the lodestar figure is ‘presumptively reasonable,’ the court may adjust it upward or downward by an appropriate positive or negative multiplier reflecting a host of ‘reasonableness’ factors.” *Id.* at 941–42 (citation omitted). Where, as here, the lodestar is being used as a cross-check, courts may do a rough calculation “with a less exhaustive cataloging and review of counsel’s hours.” *Young v. Polo Retail, LLC*, No. 02-CV-04546-VRW, 2007 WL 951821, at *6 (N.D. Cal. Mar. 28, 2007); *see also In re Toys R Us-Delaware, Inc.—Fair & Accurate Credit Transactions Act (FACTA) Litig.*, 295 F.R.D. 438, 460 (C.D. Cal. 2014) (“In cases where courts apply the percentage method to calculate fees, they should use a rough calculation of the lodestar as a cross-check to assess the reasonableness of the percentage award.”).

In his Report and Recommendation, the Special Master spells out his lodestar calculation as part of his third approach for awarding fees. *R. & R.*, at 27. The Special Master highlights two central concerns, one with respect to billing rates and one with respect to hours. *Id.* First, as to billing rates, the Special Master concludes that Class Counsel charged unreasonable rates for contract and staff attorneys and recommends using a flat rate of \$156 per hour for all contract and staff attorneys. *Id.* at 12–14. Second, as to hours, the Special Master notes various ways in which Class Counsel’s hours appear excessive and recommends reducing the total hours by 10% to address duplication. *Id.* at 15–18, 27. The Special Master also believes that a multiplier is inappropriate. *Id.* at 23. The Special Master’s ultimate recommended award (before deducting expenses) is \$30,587,696.00. *Id.* at 27.

1 The Court accordingly analyzes the billing rates, hours, and multiplier in turn, paying
 2 special attention to the particular issues that the Special Master raises with respect to the lodestar
 3 calculation.

4 **i. Billing Rates**

5 Aside from contract and staff attorneys, the Special Master concludes that the overall rates
 6 charged by the law firms in this case “do not appear excessive.” R. & R., at 15. Having reviewed
 7 the billing rates for those individuals (attorneys, paralegals, and litigation support staff) at each of
 8 the firms representing Plaintiffs in this case, the Court agrees that the rates for all billers except
 9 contract and staff attorneys are reasonable in light of prevailing market rates in this district and
 10 that Class Counsel have submitted adequate documentation justifying those rates. *See* ECF No.
 11 916-3 (charts showing rates charged by Class Counsel here and judicial approvals of the same or
 12 comparable rates for individuals with similar experience).

13 In addition, for all billers except contract and staff attorneys, the billing rates submitted
 14 vary appropriately based on experience. Specifically, the billing rates for partners range from
 15 about \$400.00 to \$970.00. *See* Cervantez Decl. ¶ 48; Cervantez Decl., Ex. 1 (summarizing rates
 16 for all billers); *see also In re High-Tech*, 2015 WL 5158730, at *9 (approving partner rates from
 17 “about \$490 to \$975”). The billing rates for non-partner attorneys, including senior attorneys, of
 18 counsel, and associates, range from about \$185.00 to \$850.00, with most under \$500.00. *See*
 19 Cervantez Decl. ¶ 48; Cervantez Decl., Ex. 1; *see also In re High-Tech*, 2015 WL 5158730, at *9
 20 (approving non-partner attorney rates from “about \$310 to \$800”). The billing rates for
 21 paralegals, law clerks, and litigation support staff range from about \$95.00 to \$440.00, with most
 22 under \$300.00. *See* Cervantez Decl. ¶ 48; Cervantez Decl., Ex. 1; *see also In re High-Tech*, 2015
 23 WL 5158730, at *9 (approving paralegal and staff rates from “about \$190 to \$430”).

24 In his objection to the Special Master’s Report and Recommendation, Schulman for the
 25 first time raises a challenge to the billing rates for summer law clerks. *See* Schulman Obj. at 5 &
 26 n.1. However, he summarily states that “the special master’s report is silent regarding the law

1 clerks—summer associates—billed at between \$270 and \$345/hour by class counsel for a total of
 2 over \$134,000.” *Id.* at 5 n.1. Plaintiffs, however, submitted evidence with their motion for
 3 attorneys’ fees that included citations to court approvals of law clerk hourly rates at between
 4 \$285.00 and \$330.00 per hour in this district. *See* ECF Nos. 916-31 ¶ 24 (citing *In re High-Tech*,
 5 in which this Court approved law clerk rates between \$295.00 and \$330.00 per hour), 916-1 ¶ 88
 6 (citing *Spicher v. Aidells Sausage Co., Inc.*, No. 15-CV-05012-WHO (N.D. Cal. May 31, 2017), in
 7 which Judge Orrick found reasonable the 2017 rate of \$285.00 per hour for law clerks). Schulman
 8 has provided no evidence or argument to rebut Plaintiffs’ submissions. *See Camacho v.*
 9 *Bridgeport Fin., Inc.*, 523 F.3d 973, 980 (9th Cir. 2008) (noting that party opposing fee request
 10 has the burden to rebut fee applicant’s declarations establishing the prevailing market rate). Thus,
 11 the Court will not disturb the hourly billing rates for summer law clerks.

12 The real dispute focuses on the appropriate billing rate for contract and staff attorneys. As
 13 a general matter, contract attorneys are “attorneys who are not permanent employees of the law
 14 firm, are hired largely from outside staffing agencies, are not listed on counsel’s law firm website
 15 or resume, are paid by the hour, and are hired on a temporary basis to complete specific projects
 16 related to a particular action,” whereas staff attorneys are “non-partnership-track attorneys
 17 working on an hourly basis.” Special Master’s Report and Recommendations at 181–89, *Ark.*
 18 *Teacher Ret. Sys. v. State Street Bank & Trust Co.*, No. 11-CV-10230-MLW (D. Mass. May 14,
 19 2018) (quoting *In re Citigroup Inc. Sec. Litig.*, 965 F. Supp. 2d 369, 394 (S.D.N.Y. 2013)). In the
 20 instant case, all of the contract attorneys and all but one of the staff attorneys were paid at an
 21 hourly rate. ECF No. 977-3. The remaining staff attorney—Phi Anh Nguyen at Lieff Cabraser
 22 Heiman & Bernstein, LLP—received an annual salary rather than an hourly wage. *Id.* at 3.
 23 Because Plaintiffs address contract and staff attorneys as a collective and do not advocate for
 24 treating these groups separately, the Court analyzes them together.

25 In the Order Granting Motion to Appoint Special Master, this Court recognized a
 26 significant disparity between the billing rates charged and the hourly rates paid for the work

1 performed by contract and staff attorneys on this case. ECF No. 972 at 4. The Court explained
 2 that “a large number of contract attorneys, staff attorneys, and a contract paralegal worked on the
 3 case” and that “the markup charged for their work was as high as \$447 an hour.” ECF No. 972 at
 4 4. The Special Master’s Report and Recommendation expands on this concern. The Special
 5 Master notes that the 33 contract and staff attorneys in this case were “paid by the firms at hourly
 6 rates from \$25.00 to \$65.00, with the clear majority in the \$40.00 range.” R. & R., at 10–11.
 7 However, Class Counsel charged hourly rates for these individuals “from \$185 to \$495.” *Id.* at
 8 11. Only one contract attorney was billed out at the lowest rate of \$185.00 per hour, and more
 9 than half of the contract and staff attorneys were billed out at over \$350.00 per hour. ECF No.
 10 977-3. The total lodestar claimed for contract attorneys is \$6,997,153.50. *Id.* at 3. Excluding the
 11 annual salary paid to Phi Anh Nguyen, a comparison of the amount paid to these hourly
 12 employees (\$727,537.86) to the amount charged for these hourly employees (\$6,034,063.92)
 13 yields a profit margin of \$5,306,526.06. *Id.* This profit margin constitutes almost **14%** of the
 14 Plaintiffs’ total lodestar figure of \$37,993,566.50.

15 The Special Master concludes that it is “simply inappropriate” to bill contract and staff
 16 attorneys at the same rate applied to attorneys with four to eight years of experience. *Id.* The
 17 Special Master points to multiple district court cases in which contract and staff attorneys have
 18 been billed at cost with no markup. *Id.* at 11–12. However, finding no requirement to bill these
 19 attorneys in that manner, the Special Master instead sensibly recommends looking to the nature of
 20 their work. *Id.* at 12. Because the contract and staff attorneys here performed mostly document
 21 review, the Special Master advises charging these individuals at the rate of a paralegal—namely,
 22 \$156.00 per hour. *Id.* Performing that calculation, the Special Master retrieves a figure of
 23 \$3,033,482.40 (19,445.4 hours x \$156.00 per hour), or a \$3,963,671.10 cut from Plaintiffs’
 24 claimed lodestar for these attorneys. *Id.* at 14.

25 Both Plaintiffs and Schulman object to the Special Master’s suggestion. Plaintiffs argue
 26 that the comparison to paralegal rates is unsound because the tasks assigned to contract and staff

1 attorneys in this case were tasks that only an attorney could perform. Pls.’ Obj. at 5. Plaintiffs
2 also object that the chosen rate of \$156.00 per hour is not a prevailing market rate, but instead a
3 Laffey Matrix rate. *Id.* at 6–7. Schulman, in contrast, posits that contract and staff attorneys
4 should be billed at or near cost. Schulman Obj. at 6. The Court addresses these arguments below,
5 starting with Schulman’s contention that contract and staff attorneys should be billed at cost.

6 To the extent that Schulman advocates for a categorical rule that contract and staff
7 attorneys must be billed at cost, the Court disagrees. Schulman identifies no case adopting this
8 hardline position. In the two cited cases, counsel had billed the contract attorneys as expenses
9 (rather than as part of the lodestar), and the courts approved those expenses without requiring that
10 approach. *See Dial Corp. v. News Corp.*, 317 F.R.D. 426, 438 (S.D.N.Y. 2016); *Banas v. Volcano*
11 *Corp.*, 47 F. Supp. 3d 957, 980 (N.D. Cal. 2014). In fact, the court in *Dial* explained that “courts
12 in this Circuit have permitted attorneys to garnish their lodestars with marked-up contract attorney
13 fees.” 317 F.R.D. at 438. The court went on to “encourage[] the Plaintiffs’ class action bar to
14 consider adopting th[e] practice [of billing contract attorneys at cost] in future actions” but
15 nowhere suggested that the practice was mandated by law. *Id.* The identification of these two
16 instances also does not establish that cost is the prevailing market rate for contract or staff
17 attorneys. To the contrary, federal “courts have not spoken with one voice concerning the proper
18 treatment of contract attorney costs in the calculation of a lodestar.” *In re Cathode Ray Tube*
19 *(CRT) Antitrust Litig.*, No. 1917, 2016 WL 4126533, at *8 (N.D. Cal. Aug. 3, 2016). Indeed,
20 courts routinely reject claims that contract attorneys should be billed at the rate paid by the law
21 firms. *See, e.g., Carlson v. Xerox Corp.*, 596 F. Supp. 2d 400, 409 (D. Conn.) (collecting cases),
22 *aff’d*, 355 F. App’x 523 (2d Cir. 2009); *see also* ABA Comm. on Ethics & Prof’l Resp. Formal
23 Op. 00–420 (Nov. 29, 2000) (“Services of a contract lawyer may be billed to the client either as
24 fees for legal services or as costs or expenses incurred by the retaining lawyer.”).

25 Like the court in *Dial*, this Court commends the practice of treating contract attorney work
26 as a cost. Not only does that practice reap cost savings for the clients, but it also promotes judicial

1 efficiency by avoiding a judicial determination of fees. *Dial*, 317 F.R.D. at 438; Special Master’s
 2 Report and Recommendations at 181–89, *Ark. Teacher Ret. Sys.*, No. 11-CV-10230-MLW
 3 (detailing reasons supporting billing contract attorneys at cost). Nevertheless, the Court
 4 recognizes that counsel may be entitled to a reasonable markup to cover costs such as supervision
 5 and overhead. *See, e.g., In re AOL Time Warner S’holder Derivative Litig.*, No. 02-CV-06302-
 6 CM, 2010 WL 363113, at *26 (S.D.N.Y. Feb. 1, 2010) (“Economic rationality dictates that the
 7 fees [law firms] charge clients be higher than the amounts paid to their timekeeping personnel.”);
 8 Kathryn M. Fenton, *Use of Temporary or Contract Attorneys*, 13 FALL Antitrust 23, 24 (1998)
 9 (“Today it is not uncommon for an employing law firm to pay the temporary lawyer at one rate
 10 and charge that lawyer’s services to the client at a higher rate that covers overhead and a
 11 contribution to firm profits.”). Relatedly, the ABA Standing Committee on Ethics has concluded
 12 that “a lawyer may, under the Model Rules, add a surcharge on amounts paid to a contract lawyer
 13 when services provided by the contract lawyer are billed as legal services.” ABA Comm. on
 14 Ethics & Prof’l Resp. Formal Op. 00–420 (Nov. 29, 2000); *see also Brazitis v. Colvin*, No. 11-CV-
 15 07993, 2013 WL 6081017, at *2 (N.D. Ill. Nov. 19, 2013) (“[A]ttorneys regularly add a surcharge
 16 to the cost of the contract attorneys they engage, and do so ethically as long as the overall fee is
 17 reasonable.”). Thus, the Court must determine the reasonable rate to be charged for contract and
 18 staff attorneys here.

19 The Court begins by emphasizing how striking the markup is in this case. All told, the
 20 profit margin based purely on a markup for non-salaried contract and staff attorney hourly work is
 21 \$5,306,526.06. R. & R., at 11. This figure constitutes almost **14%** of the Plaintiffs’ total lodestar
 22 figure of \$37,993,566.50. More specifically, the non-salaried contract and staff attorneys’ hourly
 23 rates ranged from \$25.00 to \$65.00, but these individuals were billed at hourly rates ranging from
 24 \$185.00 to \$495.00 with most over \$350.00. *Id.* at 10–11. In some instances, the markup was
 25 \$447.00 an hour. ECF No. 972 at 4. On average, Plaintiffs charged a markup of approximately
 26 729%. Plaintiffs provide no explanation for why markups of this magnitude were necessary or

1 why markups for some contract and staff attorneys appear to greatly exceed markups for some
2 associates.

3 Nor is the Court persuaded by Professor William B. Rubenstein's declaration, which
4 analyzes contract and staff attorney rates approved by federal courts. The Court notes that
5 Plaintiffs submitted this declaration after the deadline for objections to the fee request had expired,
6 thus depriving class members of an adequate opportunity to protect their rights and ensure
7 adversarial testing of issues related to the fee award. *Cf. In re Mercury Interactive Corp. Sec.*
8 *Litig.*, 618 F.3d 988, 993–94 (9th Cir. 2010) (holding that district courts must “set the deadline for
9 objections to counsel’s fee request on a date after the motion and documents supporting it have
10 been filed”). Nevertheless, even if the Court considers Professor Rubenstein’s declaration, the
11 Court finds his data inconclusive. Specifically, Professor Rubenstein examined the contract and
12 staff attorney rates approved in 13 class-action cases from 2014 to 2017 by federal judges in
13 various districts. ECF No. 991 (“Rubenstein Decl.”), Ex. G. As Professor Rubenstein explains,
14 the “rates in those cases (all adjusted to 2017 dollars) ranged from \$240.00 to \$594.26,” with a
15 weighted mean of \$398.80. Rubenstein Decl. ¶ 26. In contrast, the weighted mean for the
16 contract and staff attorneys who billed in this case is \$360.12. *Id.*

17 In the Court’s view, Professor Rubenstein’s numbers likely skew too high. His data set
18 does not take into consideration the authority, including authority from this district, where contract
19 attorneys have been billed at cost. *See Dial*, 317 F.R.D. at 438; *Banas*, 47 F. Supp. 3d at 980. The
20 Court also does not find much force in the cases where higher rates were approved because it does
21 not appear that this issue was disputed in any of these cases and the orders do not explicitly
22 address the disparity between the rates at which contract attorneys were paid and the rates at which
23 they were charged. For example, in *In re Volkswagen “Clean Diesel” Marketing, Sales Practices,*
24 *and Products Liability Litigation*, the papers discussed the notion that firms may bill out contract
25 attorneys at an hourly rate much higher than their hourly wage, but Judge Breyer’s attorneys’ fees
26 order does not refer to contract attorneys, likely because there were no filed objections to the

1 attorneys' fees request. *See In re Volkswagen "Clean Diesel" Mktg., Sales Practices, & Prod.*
 2 *Liab. Litig.*, No. MDL 2672, 2017 WL 3175924 (N.D. Cal. July 21, 2017), ECF No. 3396-2
 3 ¶¶ 33–34. Likewise, in *Nitsch v. DreamWorks Animation SKG Inc.*, this Court approved contract
 4 and staff attorney hourly rates mostly ranging from \$250.00 to \$275.00 (with an outlier at
 5 \$446.75), yet Plaintiffs do not suggest that the Court was presented with the hourly rates class
 6 counsel paid to those attorneys, and the issue was not raised by either the Court or the parties. *See*
 7 *generally Nitsch v. DreamWorks Animation SKG Inc.*, No. 14-CV-04062-LHK, 2017 WL
 8 2423161 (N.D. Cal. June 5, 2017), ECF Nos. 331-2, 331-3, 331-4. As a formal matter,
 9 “[q]uestions which merely lurk in the record, neither brought to the attention of the court nor ruled
 10 upon, are not to be considered as having been so decided as to constitute precedents.” *Cooper*
 11 *Indus., Inc. v. Aviall Servs., Inc.*, 543 U.S. 157, 170 (2004) (citation omitted).

12 This Court will use an hourly rate of \$240.00—the low end of the range that Professor
 13 Rubenstein has identified as having been approved in federal class actions. At least in the context
 14 of this rough calculation of the lodestar figure, the Court finds that \$240.00 per hour adequately
 15 accounts for the qualifications and experience of the contract and staff attorneys as well as the
 16 largely document-review work they performed. *See R. & R.*, at 12 (observing that much of the
 17 contract attorney work in this case falls under the task code for document review). Indeed, that
 18 rate has previously been judicially approved in this district. *See Walsh v. CorePower Yoga LLC*,
 19 No. 16-CV-05610-MEJ, 2017 WL 4390168 (N.D. Cal. Oct. 3, 2017), ECF No. 44-2. Court
 20 approval may provide “satisfactory evidence of the prevailing market rate.” *United Steelworkers*
 21 *of Am. v. Phelps Dodge Corp.*, 896 F.2d 403, 407 (9th Cir. 1990). Moreover, the \$240 hourly rate
 22 still encapsulates a sizeable markup (ranging from 860% for contract attorneys paid \$25.00 per
 23 hour to 269% for contract attorneys paid \$65.00 per hour) while scaling back Plaintiffs’
 24 unreasonably high markup profit of \$5,306,526.06. In future cases, the Court is willing to receive
 25 documentation justifying a lower or higher rate, but for purposes of the rough lodestar calculation
 26

1 here, the Court finds that \$240.00 per hour for contract and staff attorney time is a reasonable
2 rate.⁷

3 Plaintiffs' documents show that the contract and staff attorneys billed a total of 19,445.4
4 hours in this case. ECF No. 977-3. At the rate of \$240.00 per hour, the total amount comes to
5 \$4,666,896.00. Plaintiffs actually claim \$6,997,153.50. *Id.* Accordingly, to account for
6 Plaintiffs' excessive contract and staff attorney rates, the Court finds it appropriate to reduce
7 Plaintiffs' lodestar figure by \$2,330,257.50 (\$6,997,153.50 – \$4,666,896.00). Even with these
8 adjusted amounts, the resulting profit margin of \$3,939,358.14 (\$4,666,896.00 – \$727,537.86) still
9 constitutes **11%** of the adjusted lodestar of \$35,663,309.00. The Court next addresses hours.

10 **ii. Hours**

11 As noted earlier, the hours component of the lodestar is comprised of “the number of hours
12 the prevailing party reasonably expended on the litigation.” *In re Bluetooth*, 654 F.3d at 941
13 (citing *Staton*, 327 F.3d at 965). Accordingly, the Court may excise from the calculation any
14 hours that are duplicative, excessive, or otherwise unnecessary. *See Chalmers*, 796 F.2d at 1210;
15 *see also Hensley*, 461 U.S. at 434 (explaining that district courts should remove “hours that are
16 excessive, redundant, or otherwise unnecessary”). As in other contexts, the party seeking fees
17 “bear[s] the burden of showing the time spent and that it was reasonably necessary to the
18 successful prosecution of [the] claims.” *Frank Music Corp. v. Metro-Goldwyn-Mayer Inc.*, 886
19 F.2d 1545, 1557 (9th Cir. 1989); *see also Webb v. Bd. of Educ. of Dyer Cty., Tenn.*, 471 U.S. 234,
20 242 (1985) (“[T]he party seeking an award of fees has the burden of submitting ‘evidence
21 supporting the hours worked and rates claimed.’” (quoting *Hensley*, 461 U.S. at 433)); *Harris v.*
22 *Maricopa Cty. Superior Court*, 631 F.3d 963, 971–72 (9th Cir. 2011) (“[I]n cases involving
23

24 ⁷ The Court notes that there may also be justifications for applying different markups for contract
25 attorneys and for staff attorneys. *See* Special Master's Report and Recommendations at 181–89,
26 *Ark. Teacher Ret. Sys.*, No. 11-CV-10230-MLW (distinguishing between contract and staff
27 attorneys). Because neither party argues for applying different markups for contract attorneys and
28 staff attorneys in this case, the Court need not address the issue here.

1 attorneys fees generally, “[t]he burden of establishing entitlement to an attorneys fees award lies
2 solely with the claimant.” (citation omitted)).

3 The Court raised the issue about whether Class Counsel’s hours were reasonably expended
4 in the Order Granting Motion to Appoint Special Master. See ECF No. 972 at 4 (citing *Young*,
5 2007 WL 951821, at *6). The Court explained that it had concerns about duplication and
6 inefficiency “based on Co-Lead Plaintiffs’ Counsel’s assignment of tasks across 53 law firms and
7 [329] billers.” *Id.* at 5. Although “this case required a significant amount of work,” “employing
8 53 law firms likely resulted in unnecessarily duplicative or inefficient work by virtue of the fact
9 that so many billers needed to familiarize themselves with the case and keep abreast of case
10 developments.” *Id.* The Court asked the Special Master to review the record and “determine the
11 hours reasonably expended, deducting the time and expenses that are excessive, unnecessary, or
12 duplicative.” ECF No. 985 at 2.

13 The Special Master undertook that task in his Report and Recommendation. The Report
14 and Recommendation agrees that the hours billed appear excessive. R. & R., at 16–18. At the
15 high level, the Special Master colorfully explains that with a “virtual army of billers” spread
16 across 53 law firms (when the Court appointed only 4), Class Counsel could not “possibly conduct
17 effective oversight of this very large team.” *Id.* at 17–18. The mere fact of this wide array of
18 “billing participants presents at least a strong possibility of duplication and unreasonable hours,”
19 especially because “every time a new law firm was added to the group, those lawyers had to spend
20 time learning the history, issues, and facts being litigated.” *Id.* at 18. More specifically, the
21 Special Master highlights areas where the hours expended are excessive, including deposition
22 preparation, document review, class-certification work, settlement preparation, and post-settlement
23 work. *Id.* at 16–17. To take one example, counsel charged approximately 13,800 hours for 194
24 depositions, equating to over 71 hours per deposition. *Id.* at 16. In light of these excesses, the
25 Special Master recommends taking a 10% haircut of the hours, as warranted by Ninth Circuit law.
26 *Id.* at 24–25, 27–28.

1 The Court starts with the case law to provide relevant context. The Ninth Circuit first
2 discussed the propriety of a 10% haircut in *Moreno v. City of Sacramento*, 534 F.3d 1106 (9th Cir.
3 2008). There, the district court “found the hours requested to be excessive, suggesting that some
4 of the research was duplicative because counsel spent substantial time preparing motions and
5 briefs dealing with similar issues.” *Id.* at 1112. The district court therefore cut the hours by 25%
6 (on top of the 9% already cut by plaintiff’s counsel), but provided “no specific explanation as to
7 which fees it thought were duplicative, or why.” *Id.* On appeal, the Ninth Circuit vacated,
8 concluding that an explanation for the cuts was lacking. *Id.* at 1116. The Ninth Circuit held that a
9 “district court can impose a small reduction, no greater than 10 percent—a ‘haircut’—based on its
10 exercise of discretion and without a more specific explanation.” *Id.* at 1112. In order to go
11 beyond that 10% haircut, “the district court’s justification for the cuts must be weightier and more
12 specific.” *Id.* at 1113. Because the district court had taken a cut greater than 10% without any
13 explanation—let alone a clear one—for doing so, the Ninth Circuit vacated the fee award. *Id.*

14 Neither Plaintiffs nor Schulman disputes that the 10% haircut contemplated by *Moreno*
15 may be applied in this case, but they present different views about how large the percentage cut
16 should be. Plaintiffs argue that no haircut is warranted because the hours expended were
17 reasonably necessary. Pls.’ Obj. at 19–21; Pls.’ Resp. at 6–9. Schulman asserts that the 10%
18 haircut is not enough and identifies a number of other cuts to be made in addition to the 10%
19 haircut. Schulman Obj. at 12–13. The Court adopts the Special Master’s recommendation to
20 apply a haircut but agrees with Schulman that a greater-than-10% haircut—specifically, a cut of
21 13%—is warranted.

22 The Court need not offer a “specific explanation” to apply the 10% haircut to Class
23 Counsel’s claimed hours. *See Moreno*, 534 F.3d at 1112. Nonetheless, an overview of the factual
24 background demonstrates why the Court and Special Master harbor a legitimate concern about
25 duplicative and unnecessary billing. Specifically, as the Special Master recognizes, Class
26 Counsel’s unilateral decision to add 49 law firms to the Court-approved four-firm structure

1 violated the Court’s protocol, which was designed to promote efficiency and orderly progression
 2 of the case. *See R. & R.*, at 17 (describing Class Counsel’s actions as “contrary to the letter and
 3 spirit of the Court’s appointment orders regarding lead counsel”); *id.* at 26 (stating that “the
 4 number of counsel” and “the overlapping staffing” were “in contravention of the Court’s
 5 admonitions”). Indeed, the Court definitively rejected Co-Lead Counsel’s proposal of a larger
 6 eight-firm structure and instead appointed a four-firm steering committee. ECF No. 972 at 2–3.
 7 Class Counsel were permitted to utilize other counsel, but the Court made clear that any such
 8 assignment should cover a discrete task and should be made sparingly “on an as needed basis and
 9 consistent with efficiency.” *Id.* at 3–4 (quoting ECF No. 286 at 1). However, billing by non-
 10 appointed firms totals \$13,589,993.00, or 35.8% of the \$37,993,566.50 claimed lodestar. *See* ECF
 11 No. 960-5. Given the Court’s judgment that a core of four firms (with occasional targeted
 12 assistance from other firms) would be sufficient to manage this case effectively and efficiently,
 13 Class Counsel’s decision to employ 53 law firms and 329 billers across the country was almost
 14 necessarily excessive.

15 As this Court explained, the major concern is that there may be “unnecessarily duplicative
 16 or inefficient work by virtue of the fact that so many billers needed to familiarize themselves with
 17 the case and keep abreast of case developments.” ECF No. 972 at 5. That risk seemed
 18 particularly acute because more partners (107) than associates (92) worked on the case, likely
 19 because the work was spread across a large number of firms rather than concentrated in a few
 20 firms. *See Cervantez Reply Decl.*, Ex. E (providing updated list of billers).⁸ The Special Master’s

21 _____
 22 ⁸ The Court does not “set the fee based on speculation as to how other firms would have staffed
 23 the case.” *Moreno*, 534 F.3d at 1114. Rather, the imbalance between partners and associates is an
 24 indicator that Class Counsel did not assign tasks based on “the skill requisite to perform the legal
 25 service” and thus informs the overall picture of duplication. *Hensley*, 461 U.S. at 430. Plaintiffs
 26 have filed an untimely declaration from Professor Rubenstein that assuages, but does not
 27 eliminate, the concerns noted by the Court. The Court reiterates that it would have been preferable
 28 for Plaintiffs to submit this declaration with their fee motion so that class members would have an
 opportunity to discuss the declaration in their objections. *Cf. In re Mercury*, 618 F.3d at 993
 (noting that objection deadline should be set after class counsel has filed its fee motion and
 supporting documents). In any event, the Court notes multiple shortcomings in Professor

1 Report and Recommendation echoes the concern that the large and widespread array of “billing
2 participants presents at least a strong possibility of duplication and unreasonable hours,” especially
3 because “every time a new law firm was added to the group, those lawyers had to spend time
4 learning the history, issues, and facts being litigated.” R. & R., at 18.

5 The Court is not persuaded by Plaintiffs’ suggestion that non-appointed firms “were
6 forbidden to bill for any start-up time learning the facts and law of the case.” Pls.’ Obj. at 14. In
7 fact, Class Counsel’s billing memo specifically allowed counsel working on the case to bill for
8 reviewing documents and filings “to gain general familiarity.” ECF No. 190-1 at 6. A sampling
9 of the billing records reveals that non-appointed firms claimed such hours. *See, e.g.*, ECF Nos.
10 1002-10 at 1, 3, 56, 58 (billing hours for reading or analyzing complaint); 1002-18 at 6, 8, 13
11 (billing hours for reading and reviewing complaint “to become familiar with case”). General
12 familiarity likely included review of the 291-page operative complaint; the 82-page order on the
13 first motion to dismiss, ECF No. 468; the 90-page order on the second motion to dismiss, ECF No.
14 528; and the rulings on the 15 discovery motions litigated before this Court and the District of
15 Columbia, ECF No. 916-8 ¶ 37.

16 Comparing the lodestar claimed in the instant case to the lodestar claimed in another novel
17 and highly complex case, *In re High-Tech*, further suggests that the hours here are unreasonably
18 high. *In re High-Tech* involved complex antitrust issues of first impression in an action against
19 seven large technology companies—including Google, Apple, and Intel—regarding an alleged
20 conspiracy to fix and suppress employee compensation. 2015 WL 5158730, at *10. Class counsel
21 in *In re High-Tech* engaged in many more rounds of motions practice, and the parties progressed
22

23 Rubenstein’s calculation that “non-partner attorney timekeepers billed almost twice the number of
24 total hours as did the partners.” Rubenstein Decl. ¶ 14. First, Professor Rubenstein does not
25 compare time billed by partners to time billed by associates, but instead time billed by partners to
26 time billed by non-partners (including of counsel, associates, fellows, and contract attorneys).
27 Second, Professor Rubenstein does not opine that a 1:2 ratio between partner and non-partner time
28 is common or typical. Third, and finally, Professor Rubenstein aggregates the information but
provides no analysis of whether the 49 non-appointed firms utilized a pyramid structure.

1 significantly closer to trial than Class Counsel in the instant case. Most prominently, in the four
 2 years that the case was pending, Class Counsel in *In re High-Tech* survived two motions to
 3 dismiss, litigated two rounds of class certification, opposed an appeal to the Ninth Circuit under
 4 Federal Rule of Civil 23(f), survived five summary judgment motions, survived multiple rounds of
 5 *Daubert* challenges, filed and opposed motions in limine, filed a motion and reply regarding
 6 application of the rule of reason, prepared for the pretrial conference and trial, negotiated three
 7 settlements, and opposed mandamus in the Ninth Circuit. *Id.* More precisely, class counsel in *In*
 8 *re High-Tech*:

9 (1) identified the alleged conspiracy to fix and suppress employee compensation
 10 in the tech industry; (2) met with their clients and secured retainer agreements; (3)
 11 prepared and filed multiple complaints against Defendants; (4) survived two
 12 motions to dismiss; (5) undertook considerable discovery, including taking 93
 13 depositions and defending 14 others, serving 75 document requests, reviewing the
 14 resulting 325,000 documents (over 3.2 million pages), serving 28 subpoenas on
 15 third parties, reviewing 8,809 pages of documents from those third parties,
 16 producing over 31,000 pages of documents in response to Defendants' document
 17 requests, and responding to and reviewing 34 subpoenas served by Defendants on
 18 third parties; (6) retained four experts to assist in analyzing over 15 gigabytes of
 employment-related compensation and recruiting data; (7) worked with the
 experts to produce multiple expert reports; (8) filed a consolidated class action
 complaint; (9) litigated two rounds of class certification; (10) opposed a Rule
 23(f) appeal to the Ninth Circuit; (11) survived five summary judgment motions;
 (12) prepared for trial; (13) negotiated three settlements; and (14) opposed
 mandamus in the Ninth Circuit.

19 *Id.* Class counsel's efforts in *In re High-Tech* produced non-reversionary settlement funds totaling
 20 \$435 million with no claim form and an average recovery per class member of approximately
 21 \$5,942.00. *Id.* at *12. Class counsel in *In re High-Tech*, which consisted of four law firms,
 22 claimed to have spent 36,215.00 hours on the litigation, yielding a lodestar figure of
 23 \$18,201,787.50. *Id.* at *10.

24 In the instant case, Class Counsel claim to have spent 83,351.5 hours, of which they
 25 deleted 4,459 hours for a total of 78,892.5 hours, for which they claim a lodestar figure of
 26 \$37,993,566.50. In other words, Class Counsel claim to have spent more than double the time

1 litigating this case that class counsel did in *In re High-Tech*. This ratio is surprising given that,
 2 unlike here, the parties in *In re High-Tech* litigated two rounds of class certification, filed briefs in
 3 a 23(f) appeal and a mandamus action before the Ninth Circuit, litigated summary judgment,
 4 litigated multiple rounds of *Daubert* challenges, briefed motions in limine, briefed a motion
 5 regarding application of the rule of reason, prepared for the pretrial conference and trial, and
 6 negotiated three settlements, the last of which was on the eve of trial. Moreover, class counsel in
 7 *In re High-Tech* secured a significantly larger settlement (\$435 million) than the \$115 million
 8 Settlement Fund here with more direct payments to class members. The Court recognizes that
 9 there are differences between the instant case and *In re High-Tech* that may bear on the lodestar.
 10 There is no doubt that Class Counsel in the instant case achieved a significant benefit for the Class
 11 and performed a substantial amount of work, including (1) filing four complaints; (2) litigating
 12 two rounds of motions to dismiss; (3) undertaking considerable discovery, including reviewing 3.8
 13 million pages of documents; deposing 18 percipient fact witnesses, 62 corporate designees, and 6
 14 defense experts; and producing over 100 named Plaintiffs for depositions as well as 29 of those
 15 named Plaintiffs' computers for forensic examinations; (4) producing reports from 4 experts and
 16 defending their depositions; (5) briefing class certification and *Daubert* motions; and (6)
 17 negotiating a settlement. However, the Court finds that the comparison between the instant case
 18 and *In re High-Tech*—in which Class Counsel here claim to have spent more than double the time
 19 (78,892.5 hours vs. 36,215.00 hours) despite settling much earlier in the lifespan of the case—
 20 provides an additional indication that the hours here may be duplicative or excessive and that a cut
 21 of hours is warranted.

22 The Special Master's explanations justify a cut beyond 10% because the Report and
 23 Recommendation goes even further, detailing multiple areas in which Plaintiffs' hours appear
 24 excessive. The Court highlights two areas in which Plaintiffs have not carried their burden of
 25 showing that the hours expended are reasonable: (1) deposition time and (2) settlement time. As
 26 to the first category, the Special Master notes that Plaintiffs billed over 13,800 hours for 195 fact

1 and expert depositions, which “equates to [about] 71 hours per deposition.” R. & R., at 16 (citing
2 Cervantez Decl. ¶¶ 34, 56). The Court concurs with the Special Master’s assessment that
3 Plaintiffs have not met their burden of establishing that these hours were reasonably expended.
4 *Frank Music Corp.*, 886 F.2d at 1557. Indeed, a district court in New York ruled that an average
5 of “42 billed hours per witness” was excessive. *Schoolcraft v. City of New York*, No. 10-CV-
6 06005-RWS, 2016 WL 4626568, at *9 (S.D.N.Y. Sept. 6, 2016). That court explained that this
7 number, which included instances in which two or three attorneys attended a deposition,
8 “demonstrate[d] the wasteful time spent by involving so many attorneys.” *Id.*

9 Plaintiffs similarly had two or three attorneys attend a large number of the 195 depositions
10 that took place in the instant case. Perhaps acknowledging this excess, Class Counsel “cut the
11 time of the third attorney at 12 depositions prior to submitting billing records to the Court.” Pls.’
12 Obj. at 9 n.7. Still, Class Counsel missed 11 other instances in which three attorneys were present,
13 and they admit that a total of \$55,000 for the time of a third attorney remains as part of the
14 lodestar. *Id.* The Court does not question Plaintiffs’ explanation that two attorneys may have
15 been required at some of the depositions. *See Kelly v. Wengler*, 7 F. Supp. 3d 1069, 1079 (D.
16 Idaho 2014) (finding that “the compressed litigation schedule and volume of discovery in this case
17 justified using two attorneys at the depositions”), *aff’d*, 822 F.3d 1085 (9th Cir. 2016). However,
18 Plaintiffs have not established that two attorneys were needed in more than half of the depositions.
19 *Frank Music Corp.*, 886 F.2d at 1557.

20 The billing records also contain other instances of excessive hours without sufficient
21 explanation by Plaintiffs. In their most-recent filing, Plaintiffs break out the hours between
22 depositions of experts and defense witnesses, on the one hand, and depositions of named
23 Plaintiffs, on the other. ECF No. 1037-2 (“Cervantez Supp. Decl.”) ¶¶ 12–13. As to the former
24 group, Class Counsel represent that a total of 8,153.95 hours were expended on depositions of 88
25
26

1 experts and defense witnesses.⁹ *Id.* ¶ 17. This translates to an average of 92.7 hours per
 2 deposition. *Id.* That number becomes even more striking once the Court looks to individual
 3 circumstances. For example, Class Counsel spent more than 300 hours preparing for and taking
 4 the deposition of Stephen Moore, an Anthem staff vice president in the information security
 5 department. Cervantez Reply Decl. ¶ 42. Similarly, Class Counsel spent 110 hours preparing for
 6 and taking the deposition of Thomas Miller, Anthem’s Chief Information Officer. *Id.* The Court
 7 has no doubt that these depositions were important and required significant preparation, but
 8 Plaintiffs do not offer a persuasive explanation for why these amounts of time were reasonably
 9 expended, especially when the preparation of these witnesses likely overlapped with preparation
 10 for other witnesses. Additionally, the Court notes that the 8,153.95 hours billed in Task Code 5
 11 (“Depositions”) for defense witnesses and experts does not encompass the entire amount of
 12 deposition time as Plaintiffs’ description of Task Code 7 (“Experts”) also includes deposing
 13 Defendants’ experts and defending Plaintiffs’ own expert depositions. Cervantez Decl. ¶ 56.

14 Plaintiffs also have not established that the time billed for depositions of named Plaintiffs
 15 was reasonable. As to this group, Class Counsel represent that a total of 5,721.55 hours were
 16 expended on depositions of 107 named Plaintiffs, or 53.5 hours per deposition.¹⁰ Cervantez Supp.
 17 Decl. ¶ 16. There is significant and unexplained variation in billed deposition time between
 18 named Plaintiffs: those figures range anywhere from 6.9 hours for named Plaintiff Christopher
 19 Allen to 105.4 hours for named Plaintiff David Ifversen.¹¹ Cervantez Supp. Decl., Ex. B-1. The
 20 high end of 105.4 hours is particularly concerning because that number is nearly equal to the 110
 21

22 ⁹ The Court points out that previous documents filed in this case indicate that the total number
 23 may be 90 witnesses—namely, 18 fact witnesses, 62 corporate designees, 6 defense experts, and 4
 24 plaintiff experts. Cervantez Decl. ¶ 3. Because this difference is immaterial to the Court’s
 25 analysis, the Court will use Plaintiffs’ figure.

26 ¹⁰ The Court notes that the two deposition figures that Plaintiffs provide—8,153.95 hours for
 27 experts and defense witnesses and 5,721.55 hours for named Plaintiff depositions—exceed the
 28 reported total of 13,870.5 deposition hours by 5 hours. This discrepancy does not affect the
 Court’s analysis. The Court will use the reported figure of 13,870.5 hours as the total number of
 requested deposition hours.

¹¹ The Court excludes named Plaintiffs for whom Class Counsel billed less than 6.5 hours.

1 hours of deposition time for Anthem’s Chief Information Officer. Plaintiffs do not tell the Court
2 why defending the deposition of named Plaintiff David Ifversen required almost as much time as
3 taking the deposition of Anthem’s Chief Information Officer. Although the FCAC identifies
4 Plaintiff David Ifversen as one of the four federal employees involved in this lawsuit, *see* FCAC
5 ¶ 299, Class Counsel expended only 28.9 hours defending another federal employee, Plaintiff
6 Alvin Lawson. Cervantez Supp. Decl., Ex. B-1. Again, Plaintiffs have not provided a satisfactory
7 explanation for these discrepancies. Indeed, these discrepancies are underscored by the fact that
8 the deposition time for most of the named Plaintiffs falls well below the average of 53.5 hours.
9 These facts support the Special Master’s conclusion that Plaintiffs have not demonstrated that the
10 time billed for depositions was reasonable and necessary.

11 Next, the Court focuses on the settlement hours. Specifically, the Special Master reports
12 that “[s]ettlement preparation consumed approximately 2,500 hours.” R. & R., at 17. To help
13 conceptualize this number, the Special Master converts it to ten-hour days, finding that the work
14 on settlement totaled the equivalent of 250 days (or over eight months). *Id.* Although these hours
15 are not as disproportionate as the deposition hours, the Special Master deems them excessive. The
16 Court also finds these hours excessive because Plaintiffs have not satisfied their burden of
17 demonstrating that these hours were reasonably expended on the litigation. *Frank Music Corp.*,
18 886 F.2d at 1557. Of course, the legal and factual complexity of the case made for intricate
19 settlement negotiations and a thorough Settlement Agreement. However, multiple aspects of the
20 billed settlement time seem problematic, and Plaintiffs offer little to justify the total number of
21 hours as reasonably expended.

22 First, as the Special Master’s Report and Recommendation notes, not only does the total
23 number of settlement hours appear excessive, but Class Counsel billed a substantial number of
24 hours after the settlement. *Id.* In their recent submission, Plaintiffs calculate that out of a total of
25
26

1 2,821.3 hours,¹² 2,069.4 settlement-related hours (or 73.3%) were accrued before the filing of the
 2 Motion for Preliminary Approval and 751.9 settlement-related hours (or 26.7%) were accrued
 3 after the filing of the Motion for Preliminary Approval. Cervantez Supp. Decl. ¶ 11. The 751.9
 4 hours expended after the Motion for Preliminary Approval is particularly salient because that
 5 number does not include any hours spent reviewing time records or preparing the motion for
 6 attorneys' fees. Cervantez Reply Decl. ¶ 22. Plaintiffs have not explained why such an inordinate
 7 proportion of hours were expended after the Motion for Preliminary Approval. Although certain
 8 settlement-related tasks, such as drafting the motion for final approval, necessarily take place after
 9 the motion for preliminary approval, *see Moore v. Verizon Commc 'ns Inc.*, No. 09-CV-01823-
 10 SBA, 2014 WL 588035, at *13 (N.D. Cal. Feb. 14, 2014), Plaintiffs do not state why those tasks
 11 required more than 751 hours in this case. The Court finds unavailing Plaintiffs' assertion that
 12 Class Counsel needed to spend large amounts of time post-settlement assisting Settlement Class
 13 Members and supervising the notice and claims process. *See* Pls.' Obj. at 12 & n.8. Without any
 14 clarifying explanation from Plaintiffs, it would seem that the Settlement Administrator and the
 15 call-in center, which is staffed by call-in center personnel, could have handled the bulk of this
 16 work.

17 Second, Plaintiffs do not put forward any convincing rationale for having five attorneys
 18 from Plaintiffs' Co-Lead Counsel and Steering Committee firms attend all three full-day
 19 mediation sessions. *See* Pls.' Obj. at 12; Cervantez Reply Decl. ¶ 46. Those three sessions took
 20 place on February 28, 2017 in New York; April 20, 2017 in New York; and May 22, 2017 in San
 21 Francisco. All three sessions were attended by the two Co-Lead Plaintiffs' Counsel and the two
 22 members of Plaintiffs' Steering Committee—Eve Cervantez (who charges \$860.00 per hour),
 23 Andrew Friedman (who charges \$870.00 per hour), Eric Gibbs (who charges \$805.00 per hour),
 24

25 ¹² The Court notes that this figure does not match the reported total of 2,821.0 hours. This
 26 inconsistency is inconsequential in the Court's analysis. The Court will use the reported figure of
 2,821.0 hours as the total number of requested settlement hours.

1 and Michael Sobol (who charges \$900.00 per hour)—as well as an additional partner from Mr.
 2 Friedman’s firm—Steven Toll (who charges \$970.00 per hour). *See* Cervantez Supp. Decl., Ex.
 3 A-1. The sessions always required cross-country travel from at least some of the lawyers: Ms.
 4 Cervantez, Mr. Gibbs, and Mr. Sobol work in San Francisco, while Mr. Friedman and Mr. Toll
 5 work in Washington, D.C. Plaintiffs do not explain each attendee’s independent role in the
 6 mediation session or the broader issue of why it was necessary for such a large group of senior
 7 attorneys to attend all of the sessions. The addition of a fifth attorney is particularly noticeable
 8 given the Court’s judgment that a four-firm structure could appropriately manage this case. ECF
 9 No. 972 at 2–3. Moreover, Mr. Toll is a named partner at Cohen Milstein Sellers & Toll PLLC
 10 who charges \$970.00 an hour and spent almost the entirety of his 135.7 hours in this case on
 11 settlement. *See* Cervantez Decl., Ex. 3; Cervantez Supp. Decl., Ex. A-1. Along with the four
 12 other attorneys, Mr. Toll had to participate in extensive preparatory discussions and had to travel
 13 to attend the mediation sessions. Because Plaintiffs have not satisfied their burden of establishing
 14 that all of this time was reasonably expended, the Court (like the Special Master) finds that the
 15 settlement hours are inflated.

16 Beyond deposition and settlement time, the Special Master also identifies document review
 17 and class certification as areas in which billed time seems excessive. *R. & R.*, at 16–17. Although
 18 the Court agrees that there may be some redundancies in these categories, the Court has not
 19 located or been pointed to specific hours that are unreasonable or excessive in these categories.
 20 For example, while the Special Master identifies instances in which associates and partners were
 21 performing document review at rates between \$375.00 and \$500.00 an hour, he does not explain
 22 how he chose these examples or whether they are representative. *Id.* Based on a review of the
 23 relevant billing entries, and in light of Plaintiffs’ justification that much of the document review in
 24 this case was highly technical and sophisticated, *see* Cervantez Reply Decl. ¶ 51, the Court does
 25 not find a categorical issue in this regard. Additionally, the Special Master suggests that the 3,300
 26 hours expended on class certification is too high. *R. & R.*, at 17. In a case of this size and

1 complexity, the Court has no basis to conclude that these hours are facially excessive.
2 Nevertheless, because the Court and the Special Master have detailed unexplained deficiencies in
3 Class Counsel’s justifications for deposition and settlement hours, the Court concludes that a
4 greater-than-10% cut of Class Counsel’s hours is warranted.

5 Under *Moreno*, the Court may cut hours by 10% without a specific explanation. 534 F.3d
6 at 1112. The Court may cut hours by more than 10% if it provides a “weightier and more
7 specific” justification for doing so. 534 F.3d at 1113. Here, the Court finds that an additional 3%
8 cut beyond the baseline 10% is more than warranted by the unexplained excesses in deposition
9 and settlement time detailed above. Schulman supports cuts in these areas as well. Schulman Obj.
10 at 12–13. Thus, the Court finds that a 13% cut is warranted in this case.

11 Schulman’s additional recommendations are not well-taken. The Court has already
12 rejected two above—namely, that contract attorneys must be billed at cost and that summer
13 associate rates should be reduced. *See id.* at 13. Schulman’s three remaining suggestions also
14 lack merit. First, Schulman suggests that the work of the 49 non-appointed firms should be
15 “roughly halved” to “penalize[] for excessive staffing” and “duplication of work,” while also
16 deducting billing for “excessive categories of work” and “questionable billing rates.” *Id.* at 12.
17 The Court’s task is to calculate the hours reasonably expended, not to impose a penalty. *See In re*
18 *Bluetooth*, 654 F.3d at 941. Schulman has not explained why a cut beyond the categories
19 discussed above is necessary. Second, Schulman argues that “associate and partner document
20 review ought to be reduced by an additional \$700,000.” Schulman Obj. at 12. As noted above, no
21 particular document review hours stand out as unreasonable or excessive. Although these hours
22 were sometimes billed at rates as high as \$500.00 per hour, that high rate appears to have been the
23 exception, not the norm. Third, and finally, Schulman endorses an additional “10% billing
24 judgment haircut . . . so as to deter class counsel from inflating billing in other cases.” *Id.* at 13.
25 Contrary to Schulman’s assertion, the Ninth Circuit’s *Moreno* opinion does not countenance using
26

1 the haircut as a deterrence mechanism; instead, the haircut functions as a means of excising excess
2 hours. *See Moreno*, 534 F.3d at 1112. Schulman’s objections are therefore overruled.

3 Plaintiffs offer one additional rebuttal to the haircut. They note that Class Counsel deleted
4 4,459 hours out of a total 83,351.5 hours submitted to Class Counsel to reach the 78,892.5 hours
5 in Plaintiffs’ formal attorneys’ fees request filed with the Court. *See* ECF No. 960-4. Plaintiffs
6 contend that Class Counsel’s self-imposed 5% cut must also be taken into account, Pls.’ Obj. at
7 15, because the Ninth Circuit in *Moreno* acknowledged the 9% cut made by plaintiff’s counsel
8 there, 534 F.3d at 1112. This argument fails on multiple fronts. First, as discussed above, the
9 Court does not find Class Counsel’s 5% cut to be completely sincere. Rather, it appears that Class
10 Counsel made this change to bring their lodestar figure more in line with the 33% request that they
11 intended to make. The Court notes that the Settlement does not permit Class Counsel to request
12 more than 33% of the fund for attorneys’ fees. As the Court explained above, before Class
13 Counsel’s 5% cut, the lodestar figure would have been approximately \$40,141,110.10, or 34.9%
14 of the Settlement Fund. There is little authority for granting nearly 35% of a settlement fund of
15 any amount, much less a megafund settlement. *See Alexander*, 2016 WL 3351017, at *2
16 (“Although a percentage award in a megafund case can be 25% or even as high as 30–40%,
17 typically the percentage award in such a case is substantially less than the 25% benchmark
18 applicable to typical class settlements in this Circuit.”). Thus, the Court finds that the 78,892.5
19 hours figure is the appropriate starting point. Second, even assuming that the original 83,351.5
20 hours figure is genuine, the Court and the Special Master have provided the “weightier and more
21 specific” justification called for by *Moreno* to make a cut larger than 10%. 534 F.3d at 1113. In
22 fact, the excesses identified above make clear why a 13% cut is justified even after Class
23 Counsel’s initial 5% cut.

24 In sum, the Court adopts the Special Master’s recommendation to apply a haircut to
25 eliminate duplicative, excessive, or otherwise unnecessary hours but concludes that the
26 circumstances warrant a 13% cut.

1 **iii. Calculation and Multiplier**

2 With the above modifications to Class Counsel’s billing rates and hours, the Court can now
 3 calculate the appropriate lodestar and determine the applicable multiplier. Class Counsel’s
 4 lodestar figure is \$37,993,566.50. *See* Cervantez Reply Decl. ¶ 17. Based on Class Counsel’s
 5 overcharging for contract attorneys, the Court first reduces Class Counsel’s lodestar figure by
 6 \$2,330,257.50. The resulting lodestar is \$35,663,309.00. Based on Class Counsel’s excessive
 7 hours, the Court then applies a 13% reduction to that figure. This calculation yields the Court’s
 8 lodestar figure of \$31,027,078.83. Using the percentage method, the Court’s figure is \$31.05
 9 million (i.e., 27% of the \$115 million fund).

10 Based on this information, the lodestar multiplier for a \$31.05 million fee award is slightly
 11 over 1.0. In the Ninth Circuit, multipliers “ranging from one to four are frequently awarded.”
 12 *Vizcaino*, 290 F.3d at 1051 n.6. When seeking appointment as Co-Lead Counsel, Class Counsel
 13 pledged to limit any multiplier in this case to 1.75. ECF No. 190 at 10. In compliance with that
 14 commitment, Plaintiffs’ attorneys’ fees request does not request a multiplier at all. Fee Mot. at
 15 20–21. Moreover, Plaintiffs have not established the circumstances necessary for a risk
 16 multiplier—namely, that “(1) attorneys [took the] case with the expectation that they will receive a
 17 risk enhancement if they prevail, (2) their hourly rate does not reflect that risk, and (3) there is
 18 evidence that the case was risky.” *Fischel v. Equitable Life Assur. Soc’y of U.S.*, 307 F.3d 997,
 19 1008 (9th Cir. 2002). A multiplier in this case would do little to serve the underlying purpose of
 20 “incentiviz[ing] attorneys to represent class clients . . . on a contingency basis” because there was
 21 little risk that the class clients here would “otherwise be denied access to counsel.” *Stanger v.*
 22 *China Elec. Motor, Inc.*, 812 F.3d 734, 741 (9th Cir. 2016) (per curiam). Indeed, this Court
 23 received 18 separate motions to serve as lead counsel in this action. ECF No. 284 at 1–2.

24 **4. Additional Objections**

25 A number of Settlement Class Members besides Adam Schulman object to the attorneys’
 26 fees request, though with far less specificity. For example, several objectors—including Alex
 27 Andrianopoulos, Ann Deibel, Marna Drum, Marie Hurt, Robert Leslie, Teresa Mayo, and John

1 Stone—generally object that the attorneys are being paid too much or that the attorneys are the
2 greatest beneficiaries of the Settlement. ECF Nos. 912 at 2; 920 at 1; 921 at 1; 932 at 3; 952 at 1;
3 944-14, Ex. D at 2; 944-14, Ex. F at 2. However, the Court’s calculation of the lodestar above
4 belies this assertion. Although the attorneys’ fees in this case are large, the time was reasonably
5 expended to obtain exceptional benefits for the Class. To the extent that these objectors raise
6 more-specific arguments as to the appropriate percentage and lodestar, the Court has already
7 addressed these issues in the analysis above. Accordingly, these objections are overruled.

8 Objectors Andrew and Dannette Coddington identify a different concern. Specifically,
9 they argue that Class Counsel attempt to “take credit” for \$260 million that Anthem was already
10 required to spend under a regulatory settlement. ECF No. 927 at 4. However, this argument
11 appears to be premised on erroneous reporting in a news article. *See* ECF No. 916-23 at 2
12 (mentioning \$260 million as the total amount already spent by Anthem). “The minimum
13 cybersecurity expenditures required over the course of the next three years in this settlement
14 represent new money, not the money Anthem already spent.” Cervantez Reply Decl. ¶ 10. In
15 other words, the Settlement mandates spending on important cybersecurity changes beyond what
16 Anthem has already done. These benefits are properly considered in determining an appropriate
17 attorneys’ fees award. The Coddingtons’ remaining contentions have already been addressed
18 above. *See* ECF No. 927 at 4–5. Thus, the Coddingtons’ objection is overruled.

19 Finally, Objector Kelly Kress raises a few other issues. First, he suggests that the
20 Settlement is a coupon settlement so “this Court should require that any fee award to class counsel
21 be tied to the value of the benefit actually used by the class members—or the value of the number
22 of credit monitoring services actually signed up for by class members.” ECF No. 925 at 5. As the
23 Court has explained in the order granting final approval, the Settlement is not a coupon settlement
24 because Settlement Class Members need not hand over any more money to obtain the benefits of
25 the Settlement. *See In re Online DVD-Rental*, 779 F.3d at 951. Second, Kelly Kress contends that
26 Settlement Class Members cannot accurately evaluate the attorneys’ fees request because it
27 contains substantial redacted material. ECF No. 925 at 7–9. Again, as the Court states in the

1 order granting final approval, the Court has already ruled that this information is appropriately
2 sealed under the compelling reasons standard because disclosure could subject Anthem to another
3 cyberattack or advantage Anthem's competitors. *See* ECF No. 902 at 4. Significant pieces of the
4 information are publicly available and supply a sufficient basis to assess the attorneys' fees
5 request. Kelly Kress's other arguments, which focus on the size of the percentage fund and the
6 appropriate percentage figure, have already been addressed above. Accordingly, the Court
7 overrules Kelly Kress's objection.

8 **5. Conclusion**

9 For the reasons set forth above, the Court finds that an award of 27% of the common fund
10 is appropriate. Such an award represents a multiplier of slightly over 1.0, which falls within an
11 acceptable range, adding further support to the conclusion that the fees sought are reasonable. *See*
12 *Vizcaino*, 290 F.3d at 1051. Accordingly, the Court awards Class Counsel attorneys' fees in the
13 amount of \$31.05 million. The Court believes that this amount adequately compensates Class
14 Counsel for their work in this case.

15 **B. Expenses**

16 In common-fund cases, the Ninth Circuit has stated that the reasonable expenses of
17 acquiring the fund can be reimbursed to counsel who has incurred the expense. *See Vincent v.*
18 *Hughes Air W., Inc.*, 557 F.2d 759, 769 (9th Cir. 1977); *Acosta v. Frito-Lay, Inc.*, No. 15-CV-
19 02128-JSC, 2018 WL 646691, at *11 (N.D. Cal. Jan. 31, 2018) ("There is no doubt that an
20 attorney who has created a common fund for the benefit of the class is entitled to reimbursement
21 of reasonable litigation expenses from that fund." (quoting *Ontiveros v. Zamora*, 303 F.R.D. 356,
22 375 (E.D. Cal. 2014)). Such expense awards comport with the notion that the district court may
23 "spread the costs of the litigation among the recipients of the common benefit." *Winger v. SI*
Mgmt. L.P., 301 F.3d 1115, 1121 (9th Cir. 2002).

24 Having reviewed the submissions of Class Counsel, the Court finds that their requests for
25 unreimbursed expenses are reasonable. Class Counsel submitted declarations and invoices
26 reflecting the \$2,005,068.59 in unreimbursed expenses that they incurred in this action. *See*

1 Cervantez Reply Decl. ¶¶ 23–24; Cervantez Reply Decl., Ex. I (expenses for all firms); Cervantez
2 Decl., Exs. 5–10 (expenses broken down by firm); Cervantez Reply Decl., Ex. K (additional
3 expenses after attorneys’ fees motion broken down by firm). These expenses include (1) expert
4 witness fees, (2) case-related travel, (3) transcript fees, (4) document management, (5) copying,
5 mailing, and serving documents, (6) mediators’ fees, (7) operation of a call center to respond to
6 Settlement Class Member inquiries, (8) electronic research, (9) secretarial overtime, and (10)
7 filing and court fees.

8 These expenses were necessary to the prosecution of this litigation, were the sort of
9 expenses normally billed to paying clients, and were made for the benefit of the Class. This Court
10 has previously approved the same general classes of expenses. *In re High-Tech*, 2015 WL
11 5158730, at *16. No Settlement Class Member has specifically objected to the amount of these
12 expenses or to Class Counsel being reimbursed for these expenses. The Special Master noted that
13 Class Counsel “substantiat[ed] the request for expenses incurred” and that “[t]he expense items do
14 not appear inappropriate for a case of this size.” R. & R., at 18–19. Moreover, these expenses fall
15 below the \$3 million maximum negotiated amount in the Settlement Agreement. Settlement
16 ¶ 12.1. Accordingly, the Court awards Class Counsel \$2,005,068.59 in unreimbursed expenses.

17 In addition to the request for \$2,005,068.59 in unreimbursed expenses, Class Counsel also
18 request a cost reserve of \$132,000.00. That figure breaks down into two components: a
19 \$60,000.00 reserve for a cybersecurity expert to review Anthem’s annual cybersecurity reports and
20 a \$72,000.00 reserve to keep the call center open as long as is necessary to assist class members
21 with the claims filing process. Cervantez Reply Decl. ¶ 24. The Court deems both requests
22 reasonable.

23 First, Plaintiffs reasonably request a \$60,000.00 cost reserve for retention of a
24 cybersecurity expert. As part of the Settlement, Anthem is required to increase its annual
25 spending on cybersecurity and implement certain changes to its data-security processes. *See*
26 Settlement ¶ 2. One such change is to retain an outside expert to conduct an annual cybersecurity
27 review and report the results to Class Counsel. Cervantez Decl. ¶ 60. To ensure that “Anthem is

1 indeed fulfilling its obligations under the settlement,” Class Counsel state that they “will
 2 necessarily engage a cybersecurity expert to review that report.” *Id.* Class Counsel expect the
 3 costs to run between \$10,000.00 and \$20,000.00 per report, for a total maximum payment of
 4 \$60,000.00. *Id.*

5 Second, a \$72,000.00 cost reserve for continued operation of the call center by call center
 6 personnel is also reasonable. Because Settlement Class Members overloaded Class Counsel and
 7 the Settlement Administrator with questions about the claims process, Class Counsel “established
 8 a call center [in fall 2017] with live telephone support” to help Settlement Class Members submit
 9 claim forms. *Id.* ¶ 12. The call center has received approximately 100 calls per day. *Id.* Because
 10 the claims process is ongoing, Class Counsel request \$72,000.00 to fund the call center throughout
 11 the remainder of that process. *Id.* ¶ 13. Specifically, Settlement Class Members have one year
 12 from the date of final approval to submit claims for out-of-pocket costs. Settlement ¶ 6.1. If a
 13 Settlement Class Member submits claims that are deficient, the Settlement Administrator must
 14 notify that Settlement Class Member of the problems and provide 30 days to cure these issues. *Id.*
 15 ¶ 6.2. Thus, the call center would continue to be available as further claims for out-of-pocket
 16 costs are submitted and processed.

17 The cost reserves of \$60,000.00 and \$72,000.00 are reasonable expenses that directly
 18 benefit the Class. *See Vincent v. Hughes Air W., Inc.*, 557 F.2d 759, 769 (9th Cir. 1977)
 19 (explaining that “the [common-fund] doctrine is designed to spread litigation costs proportionately
 20 among all the beneficiaries so that the active beneficiary does not bear the entire burden alone and
 21 the ‘stranger’ beneficiaries do not receive their benefits at no cost to themselves”); *cf. Staton*, 327
 22 F.3d at 975 (allowing inclusion of reasonable notice costs in “a putative common fund benefiting
 23 the plaintiffs for all purposes”). The Court has not received any objections either to the amount of
 24 these expenses or to Class Counsel being reimbursed for these expenses. The Special Master
 25 similarly did not take issue with these expenses. *R. & R.*, at 28. Even if the total cost reserve of
 26 \$132,000.00 is combined with the \$2,005,068.59 in unreimbursed expenses, the total amount of

1 \$2,137,068.59 is still less than the \$3 million maximum negotiated amount in the Settlement
2 Agreement. Settlement ¶ 12.1. Accordingly, the Court approves a cost reserve of \$132,000.00.

3 The Court rejects Schulman’s suggestion that the unreimbursed expenses (totaling
4 \$2,005,068.59) be borne by Class Counsel, not the Class. *See* ECF No. 924 at 10–12. The Special
5 Master recommends going further and requiring Class Counsel to also pay for the cost reserve
6 (totaling \$132,000.00). R. & R., at 28. Instead, the Court will allow Class Counsel to seek
7 “reimbursement of reasonable litigation expenses from th[e] [common] fund.” *Acosta*, 2018 WL
8 646691, at *11. By limiting the award to only those litigation expenses that are reasonable, the
9 Court hews to the “fundamental purpose of the common fund doctrine” and “ha[s] the class bear
10 its fair proportion of the costs of obtaining the benefits of [Class Counsel’s] services.” *Grauly*,
11 886 F.2d at 271; *Williamson v. Microsemi Corp.*, No. 14-CV-01827-LHK, 2015 WL 13650045, at
12 *2 (N.D. Cal. Feb. 19, 2015) (“Like attorneys’ fees, [litigation] expenses should be paid from the
13 common fund because all beneficiaries should bear their fair share of the costs of the litigation,
14 and these are the normal costs of litigation that are traditionally billed to paying clients.”). Thus,
15 the Court orders that the \$2,005,068.59 in unreimbursed costs and the expended portion of the
16 \$132,000.00 cost reserve be paid from the Settlement Fund.

17 **C. Service Awards**

18 Plaintiffs also request that the Court approve the service awards in the amount of
19 \$5,000.00 for 76 of the named Plaintiffs and \$7,500.00 for 29 of the named Plaintiffs, to be
20 deducted from the Settlement Fund. Service awards for class representatives are routinely
21 provided to encourage individuals to undertake the responsibilities and risks of representing the
22 class and recognize the time and effort spent in the case. In the Ninth Circuit, service awards
23 “compensate class representatives for work done on behalf of the class, to make up for financial or
24 reputational risk undertaken in bringing the action, and, sometimes, to recognize their willingness
25 to act as a private attorney general.” *Rodriguez v. W. Publ’g Corp.*, 563 F.3d 948, 958–59 (9th
26 Cir. 2009). In evaluating whether class representatives are entitled to reasonable service awards,
27 district courts “must evaluate their awards individually, using ‘relevant factors including the

1 actions the plaintiff has taken to protect the interests of the class, the degree to which the class has
2 benefitted from those actions, the amount of time and effort the plaintiff expended in pursuing the
3 litigation and reasonable fears of workplace retaliation.” *Staton*, 327 F.3d at 977 (alterations
4 omitted) (quoting *Cook v. Niedert*, 142 F.3d 1004, 1016 (7th Cir. 1998)).

5 Here, all of the named Plaintiffs have spent a significant amount of time and effort
6 assisting the litigation of this case. As the case was getting underway, each named Plaintiff
7 participated in fact-finding interviews with Class Counsel and reviewed complaint allegations
8 about themselves for accuracy. Cervantez Decl. ¶ 63. These steps helped to shape Plaintiffs’
9 case. *See id.* Each named Plaintiff gathered and produced documents in response to 33 document
10 requests and responded to 12 interrogatories, and others were required to respond to extra requests.
11 *Id.* ¶ 64. All but one of the named Plaintiffs was deposed, and several had to take time off work or
12 pay child care to travel for the preparation sessions and depositions. *Id.* ¶ 65. Importantly, the
13 discovery focused on particularly invasive details about personal and financial information. The
14 named Plaintiffs had to testify about their “personal habits regarding the security of their homes,
15 cars, email, financial accounts, and other private matters” or even provide their Social Security
16 number on the record. *Id.* ¶ 66. The named Plaintiffs also remained involved throughout the
17 course of the case; 15 submitted declarations in support of class certification. *Id.* ¶ 69.

18 In addition, 29 of the named Plaintiffs had their computers forensically examined. *Id.* ¶ 67.
19 These individuals first conferred with Class Counsel and a forensic examiner about devices in
20 their possession. *Id.* The device collection was burdensome and proceeded in one of three ways:
21 the named Plaintiffs could (1) allow a third party to enter their homes to run imaging software, (2)
22 turn over their devices to a third party for off-site scanning, or (3) allow a third party to run
23 software remotely on the devices. *Id.* The scanning process created an exact copy of the contents
24 of each named Plaintiff’s devices for review and analysis by a third party. *Id.* Moreover, the
25 scanning process was long, sometimes lasting more than 10 or 12 hours and spanning multiple
26 days, and the named Plaintiffs were not able to use their devices during that time window. *Id.*

1 Class Counsel represent that they would not have been able to negotiate the Settlement “[w]ithout
2 the significant efforts of the Named Plaintiffs.” *Id.* ¶ 70.

3 The Court finds the requested awards reasonable. The named Plaintiffs devoted substantial
4 time and effort to the litigation, which benefitted the Class, and none of the Named Plaintiffs will
5 receive any personal benefit beyond what any Settlement Class Member will receive. The
6 requested \$5,000.00 payment for 76 of the named Plaintiffs is set at the Ninth Circuit’s benchmark
7 award for representative plaintiffs. *See In re Online DVD-Rental*, 779 F.3d at 947–48; *In re Mego*
8 *Fin. Corp. Sec. Litig.*, 213 F.3d 454, 463 (9th Cir. 2000). This Court has awarded the same
9 amount to representative plaintiffs in near-identical circumstances. *See In re Yahoo Mail Litig.*,
10 No. 13-CV-4980-LHK, 2016 WL 4474612, at *11 (N.D. Cal. Aug. 25, 2016) (awarding \$5,000.00
11 where the representative plaintiffs produced personal and work emails, responded to
12 interrogatories, and testified at depositions).

13 For the remaining 29 named Plaintiffs, Class Counsel request a higher award of \$7,500.00.
14 Because the Court must evaluate the individual circumstances of each named Plaintiff, the Court
15 may award different service payments to different named Plaintiffs. *See In re High-Tech*, 2015
16 WL 5158730, at *17. Here, the larger \$7,500.00 figure for these 29 named Plaintiffs is justified
17 by the record. In addition to the substantial actions taken by the other named Plaintiffs, these 29
18 named Plaintiffs had their computers and electronic devices forensically examined to produce an
19 exact copy of their contents. Courts in this district have recognized that other forms of acutely
20 intrusive discovery can amount to a personal risk that warrants a higher service award. *See*
21 *Garner v. State Farm Mut. Auto. Ins. Co.*, No. 08-CV-01365-CW, 2010 WL 1687832, at *17
22 (N.D. Cal. Apr. 22, 2010) (awarding \$20,000.00 and taking into consideration that the named
23 plaintiff “made herself available for deposition on two separate occasions, wherein she was
24 subjected to questioning regarding her personal financial affairs and other sensitive subjects”).

25 Courts have awarded amounts exceeding \$5,000.00 and \$7,500.00 in similar cases. The
26 smaller amounts here likely reflect “the number of named plaintiffs receiving [service] payments,”
27 a consideration that the Ninth Circuit has found important. *Staton*, 327 F.3d at 977. However, the

1 requested service payments (\$597,500.00 in total) represent only 0.52% of the Settlement Fund.
2 *See In re Online DVD-Rental*, 779 F.3d at 947–48 (holding that awards cumulatively representing
3 0.17% of the settlement fund were reasonable); *Rhom v. Thumbtack, Inc.*, No. 16-CV-02008-HSG,
4 2017 WL 4642409, at *8 (N.D. Cal. Oct. 17, 2017) (“A \$5,000 award also equals approximately
5 1–2% of the total settlement fund, which is consistent with other court-approved enhancements.”);
6 *Perkins*, 2016 WL 613255, at *17 (approving service awards of \$1,500.00 to the nine named
7 Plaintiffs, compared to a pro rata recovery of \$20.00 for the unnamed Class Members, when the
8 service awards represented merely 0.1% of the total settlement). This percentage does not
9 approach the 6% of the settlement fund in *Staton* that went to service awards. 327 F.3d at 948–49,
10 976–77. Settlement Class Members continue to receive a significant benefit, and the requested
11 service awards represent only a small fraction of the Settlement. Thus, the Court finds reasonable
12 the suggested award amounts.

13 Only two objectors—Marna Drum and Kelly Kress—challenge the service awards. ECF
14 Nos. 925; 944-14, Ex. D. Marna Drum appears to raise a general objection to the \$597,500.00
15 amount. ECF No. 944-14, Ex. D at 2. Kelly Kress argues that the named Plaintiffs receive
16 preferential treatment in comparison to the unnamed Settlement Class Members. ECF No. 925 at
17 9–11. As a general matter, individuals who join a class action give up the right to a preferred
18 position in the settlement. *Officers for Justice v. Civil Serv. Comm’n of City & Cty. of San*
19 *Francisco*, 688 F.2d 615, 632 (9th Cir. 1982). “Nevertheless, named plaintiffs, as opposed to
20 designated class members who are not named plaintiffs, are eligible for reasonable incentive
21 payments” to compensate for their work on behalf of the class. *Staton*, 327 F.3d at 977. The
22 \$5,000.00 and \$7,500.00 service awards are respectively 100 and 150 times the \$50 payment that
23 Settlement Class Members who claimed an alternative cash payment are likely to receive. The
24 Ninth Circuit, though, has approved \$5,000.00 service awards even when they are “417 times
25 larger” than the individual award. *In re Online DVD-Rental*, 779 F.3d at 947. Moreover, the
26 Ninth Circuit has instructed that it is more important to examine the service awards in relation to
27 the overall Settlement, *see id.*, as the Court has done above. The requested awards compensate

1 named Plaintiffs for their active participation in litigation and discovery. Accordingly, these
2 objections are overruled.

3 Finally, the Court declines to follow the Special Master's recommendation to deduct the
4 service awards (totaling \$597,500.00) from Plaintiffs' attorneys' fees. R. & R., at 28. As with
5 attorneys' fees and litigation expenses, it is appropriate to pay service awards from the common
6 fund because such awards represent work done on behalf of the class. *See Rodriguez*, 563 F.3d at
7 958–59; *Williamson*, 2015 WL 13650045, at *2. Otherwise, “class members would be unjustly
8 enriched [because] they [would be] able to secure the services of the class representatives at no
9 cost.” 5 Newberg, *supra*, § 17:5. Moreover, if counsel are required to pay service awards out of
10 their own fees, they may run afoul of ethics rules prohibiting attorneys from sharing fees with non-
11 lawyers and from going into business with their clients. *See id.* Such a setup could create
12 conflicts of interest between counsel and the representative plaintiffs (as well as the class) because
13 the lawyers would be incentivized to maximize their own fees by downplaying the role of the
14 representative plaintiffs and reducing their service awards. *See Campbell v. Fireside Thrift Co.*,
15 2004 WL 49708, at *12 (Cal. Ct. App. Jan. 12, 2004) (“[I]t also appears to us to present at least a
16 potential conflict of interest for class counsel to negotiate the payment of an incentive award out of
17 their own fees, because of the resulting divergence between their own interests, those of the class
18 representative, and those of the class as a whole.”). Rather than offsetting the service awards
19 against Plaintiffs' attorneys' fees, the Court orders that the \$597,500.00 in service awards be paid
20 from the Settlement Fund.

21 **D. Special Master's Fees**

22 Under Federal Rule of Civil Procedure 53(g)(2), the Special Master's compensation must
23 be paid by a party or from a fund within the Court's control. The Court “must allocate payment
24 among the parties after considering the nature and amount of the controversy, the parties' means,
25 and the extent to which any party is more responsible than other parties for the reference to a
26 master.” Fed. R. Civ. P. 53(g)(3). The Court requested that the Special Master make a
27 recommendation about who should pay these fees. ECF No. 985 at 3.

1 The Special Master recommends that his charges be borne by Class Counsel, not the Class.
 2 R. & R., at 28. The Court agrees. Class Counsel have the ability to pay and are “more responsible
 3 than other parties,” if not solely responsible, “for the reference to a [special] master.” Fed. R. Civ.
 4 P. 53(g)(3). Class Counsel do not object. Accordingly, the Court orders that Judge Kleinberg’s
 5 fees be paid from Class Counsel’s attorneys’ fees award.

6 **E. Sealing**

7 “Historically, courts have recognized a ‘general right to inspect and copy public records
 8 and documents, including judicial records and documents.’” *Kamakana v. City & Cnty. of*
 9 *Honolulu*, 447 F.3d 1172, 1178 (9th Cir. 2006) (quoting *Nixon v. Warner Commc ’ns, Inc.*, 435
 10 U.S. 589, 597 & n.7 (1978)). Accordingly, when considering a sealing request, “a strong
 11 presumption in favor of access is the starting point.” *Id.* (internal quotation marks omitted).

12 Parties seeking to seal judicial records relating to motions that are “more than tangentially
 13 related to the underlying cause of action,” *Ctr. for Auto Safety v. Chrysler Grp.*, 809 F.3d 1092,
 14 1099 (9th Cir. 2016), bear the burden of overcoming the presumption with “compelling reasons
 15 supported by specific factual findings that outweigh the general history of access and the public
 16 policies favoring disclosure,” *Kamakana*, 447 F.3d at 1178–79 (internal quotation marks and
 17 citation omitted). Compelling reasons justifying the sealing of court records generally exist “when
 18 such ‘court files might have become a vehicle for improper purposes,’ such as the use of records to
 19 gratify private spite, promote public scandal, circulate libelous statements, or release trade
 20 secrets.” *Id.* at 1179 (quoting *Nixon*, 435 U.S. at 598). However, “[t]he mere fact that the
 21 production of records may lead to a litigant’s embarrassment, incrimination, or exposure to further
 22 litigation will not, without more, compel the court to seal its records.” *Id.*

23 Records attached to motions that are “not related, or only tangentially related, to the merits
 24 of a case” are not subject to the strong presumption of access. *Ctr. for Auto Safety*, 809 F.3d at
 25 1099; *see also Kamakana*, 447 F.3d at 1179 (“[T]he public has less of a need for access to court
 26 records attached only to non-dispositive motions because those documents are often unrelated, or

1 only tangentially related, to the underlying cause of action.” (internal quotation marks and citation
2 omitted)). Parties moving to seal records attached to motions unrelated or only tangentially
3 related to the merits of a case must meet the lower “good cause” standard of Rule 26(c) of the
4 Federal Rules of Civil Procedure. *Ctr. for Auto Safety*, 809 F.3d at 1098–99; *Kamakana*, 447 F.3d
5 at 1179–80. The “good cause” standard requires a “particularized showing” that “specific
6 prejudice or harm will result” if the information is disclosed. *Phillips ex rel. Estates of Byrd v.*
7 *Gen. Motors Corp.*, 307 F.3d 1206, 1210–11 (9th Cir. 2002) (citation omitted); *see* Fed. R. Civ. P.
8 26(c). “Broad allegations of harm, unsubstantiated by specific examples or articulated reasoning”
9 will not suffice. *Beckman Indus., Inc. v. Int’l Ins. Co.*, 966 F.2d 470, 476 (9th Cir. 1992) (citation
10 omitted).

11 Pursuant to Rule 26(c), a trial court has broad discretion to permit sealing of court
12 documents for, inter alia, the protection of “a trade secret or other confidential research,
13 development, or commercial information.” Fed. R. Civ. P. 26(c)(1)(G). The Ninth Circuit has
14 adopted the definition of “trade secrets” set forth in the Restatement of Torts, holding that “[a]
15 trade secret may consist of any formula, pattern, device or compilation of information which is
16 used in one’s business, and which gives him an opportunity to obtain an advantage over
17 competitors who do not know or use it.” *Clark v. Bunker*, 453 F.2d 1006, 1009 (9th Cir. 1972)
18 (quoting Restatement (First) of Torts § 757 cmt. b). “Generally [a trade secret] relates to the
19 production of goods It may, however, relate to the sale of goods or to other operations in the
20 business” *Id.* (alterations in original). Furthermore, the U.S. Supreme Court has recognized
21 that sealing may be justified to prevent judicial documents from being used “as sources of
22 business information that might harm a litigant’s competitive standing.” *Nixon*, 435 U.S. at 598.

23 In addition, parties moving to seal documents must comply with the procedures established
24 by Civil Local Rule 79-5. Pursuant to that rule, a sealing order is appropriate only upon a request
25 that establishes the document is “sealable,” or “privileged, protectable as a trade secret or
26 otherwise entitled to protection under the law.” Civ. L. R. 79-5(b). “The request must be

1 narrowly tailored to seek sealing only of sealable material, and must conform with Civil [Local
2 Rule] 79-5(d).” *Id.* Civil Local Rule 79-5(d), moreover, requires the submitting party to attach a
3 “proposed order that is narrowly tailored to seal only the sealable material” and that “lists in table
4 format each document or portion thereof that is sought to be sealed,” as well as an “unredacted
5 version of the document” that “indicate[s], by highlighting or other clear method, the portions of
6 the document that have been omitted from the redacted version.” Civ. L. R. 79-5(d)(1).

7 In the instant case, Plaintiffs seek to seal portions of their billing records submitted in
8 support of their motion for attorneys’ fees, litigation expenses, and service awards to class
9 representatives. ECF Nos. 1002, 1037. As the issues in the attorneys’ fees motion are “only
10 tangentially related” to the merits of the case, this Court applies the good cause standard. *Ctr. for*
11 *Auto Safety*, 809 F.3d at 1099. This Court has previously done the same in this case. ECF No.
12 995. Other courts in this district have similarly applied the “good cause” standard to documents
13 related to attorneys’ fees motions. *See, e.g., MacDonald v. Ford Motor Co.*, No. 13-CV-02988-
14 JST, 2016 WL 7826647, at *2 (N.D. Cal. Mar. 7, 2016) (“As the motion for fees is only
15 ‘tangentially related to the merits of the case,’ the Court applies the good cause standard.”);
16 *TVIIM, LLC v. McAfee, Inc.*, No. 13-CV-04545-HSG, 2015 WL 5116721, at *2 (N.D. Cal. Aug.
17 28, 2015) (applying “good cause” standard to motion for attorneys’ fees and costs); *see also In re*
18 *Cathode Ray Tube (Crt) Antitrust Litig.*, No. 1917, 2016 WL 7785855, at *1 (N.D. Cal. Oct. 3,
19 2016) (applying “good cause” standard to documents associated with an objection to a proposed
20 allocation of fees). Therefore, the Court applies the good cause standard to the instant motion.

21 Plaintiffs seek to seal portions of billing entries that contain information covered by the
22 attorney–client privilege and the work-product doctrine. ECF Nos. 1002, 1037. Multiple courts,
23 including this Court in this case, have accepted attorney–client privilege and the work-product
24 doctrine as sufficient justifications for sealing, even under the higher “compelling reason”
25 standard. ECF No. 995 at 4–5; *Fed. Trade Comm’n v. Qualcomm Inc.*, No. 17-CV-00220-LHK,
26 2018 WL 2317835, at *6 (N.D. Cal. May 22, 2018) (collecting cases); *see also In re Hewlett-*

1 *Packard Co. S'holder Derivative Litig.*, No. 15-16688, 2017 WL 5712130, at *4 (9th Cir. Nov. 28,
2 2017) (affirming sealing decision where “[t]he special master found that HP provided compelling
3 reasons to justify its sealing motion, including that the documents at issue included . . . material
4 protected by the attorney–client privilege and the work product doctrine”). Therefore, Plaintiffs’
5 billing records may be sealed to the extent that they reveal confidential legal advice or attorney
6 work product.

7 The Court notes that it denied a previous motion to seal the billing records because
8 “Plaintiffs ha[d] not narrowly tailored their request to material protected by the attorney–client
9 privilege and the work-product doctrine.” ECF No. 995 at 5. Specifically, Plaintiffs sought to
10 seal all narrative descriptions of each attorney’s work while acknowledging that those descriptions
11 contain non-privileged information. *Id.* The Court also noted the potential due process concerns
12 about overly broad sealing. *See Yamada v. Nobel Biocare Holding AG*, 825 F.3d 536, 546 (9th
13 Cir. 2016) (“[T]he district court must allow Defendants access to the timesheets, appropriately
14 redacted to remove privileged information, so they can inspect them and present whatever
15 objections they might have concerning the fairness and reasonableness of Plaintiffs’ fee request.”).
16 Thus, the Court ordered Plaintiffs to submit a narrowly tailored request. ECF No. 995 at 6.

17 Plaintiffs have done so in the instant motions to seal. ECF Nos. 1002, 1037. Almost the
18 entirety of each attorney’s narrative descriptions is now publicly disclosed. The descriptions that
19 are partially redacted typically follow one of two patterns. The first takes the form: “Email/call to
20 [client] regarding _____.” *See, e.g.*, ECF No. 1002-27 at 1 (“Calls to class member Ronna
21 Hunter regarding _____”); *id.* at 2 (“Emails with plaintiff Rud about _____”). This
22 format neatly matches the scope of the attorney–client privilege, which protects from disclosure
23 the content of confidential communications between a client and her attorney to obtain legal
24 advice. *See, e.g., United States v. Ruehle*, 583 F.3d 600, 607 (9th Cir. 2009). The second comes
25 in various forms but involves particular work or research performed by an attorney for the case.
26 For example, one entry states: “Research legal issues relating to _____.” ECF No. 1003-2 at
27 6. That information appears to fall squarely within the work-product doctrine’s core protection of

“the mental processes of the attorney” to allow the attorney to “analyze and prepare [the] client’s case.” *United States v. Nobles*, 422 U.S. 225, 238 (1975). No party raises a specific challenge to any of Plaintiffs’ sealing designations. Accordingly, the Court GRANTS Plaintiffs’ motions to seal.

III. CONCLUSION

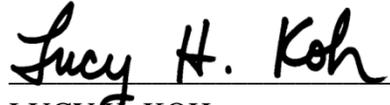

For the foregoing reasons, the Court hereby ADOPTS in part Judge Kleinberg’s Report and Recommendation. Thus, the Court GRANTS in part and DENIES in part the motion for attorneys’ fees, litigation expenses, and service awards to class representatives. The Court awards as follows:

- \$31,050,000.00 in attorneys’ fees to Class Counsel;
- \$2,005,068.59 in unreimbursed expenses to Class Counsel;
- \$132,000.00 as a total cost reserve (\$60,000.00 for retention of a cybersecurity expert and \$72,000.00 for operation of the call center); and
- \$597,500.00 in service awards (\$5,000.00 each to 76 named Plaintiffs and \$7,500.00 each to 29 named Plaintiffs).

The Court also ORDERS that Judge Kleinberg’s fees be paid from Class Counsel’s attorneys’ fees award. Finally, the Court GRANTS Plaintiffs’ motions to seal.

IT IS SO ORDERED.

Dated: August 17, 2018

 LUCY H. KOH
 United States District Judge
